INDEX

For Volume 64

INDEX FOR VOLUME 64

AUTHOR AND SUBJECT INDEX. Junior authorship is indicated by page numbers in parentheses. Page numbers of illustrations are in boldface. Pages of errata are in double parentheses. A special listing is made of "new diseases, species, and varieties."

Aapola, A. I. E., 1003
Abawi, G. S., 578
Abies sp., heart rots of, N-fixing bacteria associated with decay of, 1413
Abo-El-Dahab, M. K., (271)
Acer
  rubrum
    Phialophora melinii, Fomes connatus, and F. igniarius in wounded tissue of, 708
    wood decay in, electric current measurements of, 1375
    wounding of, callus formation and discoloration in, chemical treatments for, 580
  saccharum
    Armillaria mellea on, infection after defoliation, 817, **818**
    Fusarium canker of, epidemic in Pennsylvania, 1024
    Fusarium solani on, canker related to temperature effect, 1018
Achromobacter sp., Pseudomonas phaseolicola synergistic with, on bean, 277, **278**
Adlerz, W. C., 350
Adomako, D., 1325
Aechmea fasciata, leaf spot of, 768
aerobiology, Helminthosporium maydis race T, spore detection of, 41
aflatoxin (see **toxin**)
Agallia constricta, cell monolayers of, culture of, virus relation, 1040
Agaricus bisporus
  mummy disease of, bacteria in cells of, 1473, **1474**
  Verticillium malthousei on, benomyl tolerance to, 331
Agrios, G. N., (35), (1490)
Agrostis palustris, Pythium spp. associated with foliar blighting in, 252
Aho, P. E., 1413
air pollution (see **pollution, air-**)
Albugo cruciferarum, on Brassica spp., yield loss from, 408
Alconero, R., 679
Alexander, S., 578
alfalfa
  bacteria associated with root rot and wilt of, 867
  Colletotrichum trifolii on, dissemination and survival in field, 57
  Corynebacterium insidiosum on, toxin used in resistance, 194, **195**
  Erwinia associated with discolored roots of, 871
  Leptosphaerulina briosiana on, lesion size vs. leaf age and light intensity, 243, 582
  microbial interaction on roots of, 1169
alfalfa mosaic virus, in alfalfa, transmission and longevity in seed of, 102
Alfieri, S. A., Jr., (255), (443)
Alfonzo, M., 767
Allison, A. V., 784
Allium cepa (see **onion**)
Alon, H., 455
Alternaria sp., spore germination and infectivity of, tobacco smoke effects on, 1143
  alternata
    sporulation of, inhibition by pea substances, 585
    on tobacco, brown-pigment formation in leaves, 738
    tomato blackmold caused by, factors affecting germination, 584
  porri, on onion leaves, reaction with saprophytes, 1128
  porri solani, epidemiology in semi-arid habitats, 1035
  solani
    on potato, yield affected by interaction with Verticillium and fumigants, 860
    spore germination model, temperature effects, 605, 1192
American Phytopathological Society
  division abstracts
    Caribbean, 767
    Northeastern, 578
  fellows, 4
  manuscript preparation, author's guide for, 1
  symposium, vector relations and epidemic development, 1050
ammonium sulfamate (see **fungicides**, specific)
Anaya, M., 767, (768)
Anderson, R. J., (639)
Andrews, A. K., (770)
Andrews, J. H., 1234
Andris, H. L., (629)
anthracnose
  on alfalfa, 57
  on corn, pathogenicity and host range, 293
Anthurium andraeanum, Aphelenchoides fragariae on leaves of, hot water treatment for, 267
antibiotics
  carbomycin, citrus stubborn disease affected by, 346
  tetracycline, lethal yellowing symptom remission by, 307
  tetracycline group, citrus stubborn disease affected by, 346
Aphanomyces euteiches, on pea, pisatin related to lesions on, 1433
Aphelenchoides fragariae, on anthurium seedling leaves, 267
Aphis
  coreopsidis, bacilliform virus transmitted by, 840
  craccivora and spiraecola, vector for watermelon mosaic viruses 1 and 2, 350
Apium graveolens (see **celery**)
apple
  fire blight of, field evaluation of, 578
  Nectria galligena on
    control by difolatan and copper sulfate, 300
    factors affecting leaf scar infection, 1201
  powdery mildew of, heterothallism in, 246
  scab of
    dodine effects on ascospores, 649
    electron microscopy in, 581
Araceae, dasheen mosaic virus on spp. in, tissue culture for, 237
Arachis hypogaea (see **peanut**)
Arceuthobium campylopodum, on ponderosa pine, juvenile susceptibility to, 689, **691**
Armillaria mellea
  cell wall lysis in, by tree enzymes, 588
  light effect on thallus, 763
  on maple, after defoliation, 817, **818**
Armstrong, G. M., 849
Armstrong, J. K., (849)
Arnett, J. D., 414
Arny, D. C., (1364)
Ascochyta chrysanthemi, toxin from, production and properties, 779, **780, 781**
Ashworth, L. J., Jr., (259), 563, 629, (1043), (1159)
Aspergillus spp., on stored seeds, pathogenicity and infection sites, 1339, **1341, 1342**

candidus, aflatoxins produced by, in rice, 121
flavus
aflatoxin production by, in cottonseed, lint fluorescence related to, 452
conidial germination in, physiological factors affecting, 1151
in corn, preharvest invasion by, 797
on cotton
insects associated with, 1502, **1504**, **1505**
relation to insects and boll rot, 259
cotton boll rot caused by, detection by fluorescence, 326
cotton seed infected by, systems analysis approach to, 1451
populations in peanut soils, in Virginia, 322
glaucus, aflatoxin production by, A. parasiticus influence in, 283
niger
on onion, relation to nuclei and wounding, 1010
populations in field soils in Virginia, 322
parasiticus
on corn, preharvest invasion, 797
on rice
aflatoxin production affected by
relative humidity, 17
temperature, 283
aflatoxins produced by, 121
Atkinson, T. G., 97
Aureobasidium pullulans, on onion, reaction with Alternaria, 1128
Averre, C. W., 767
avocado (see **Persea americana**)
Ayanru, D. K. G., 595
Aycock, R., 574
Aylor, D. E., 1136
azalea, Cylindrocladium wilt of, epidemiology affected by abscised leaves, 481

Backman, P. A., (610), (1468)
bacteria (see also under specific genera)
detection in wounded trees, anaerobic environment for, 585
interaction on alfalfa roots, 1169
soft rot, selected media for isolation in soil and plants, 468
in white fir trees, relation to decay and fixation of N, 1413
xylan degraded by, testing 41 pathogenic spp., 881
bacterial pustule, on soybean, horseradish peroxidase for control of, 542
bacteriophages, Xanthomonas pruni affected by, temperature effect, 1248
Bagga, D. K., 411, 654, 658, 663
Baker, C. J., (147)
Baker, R., (38), (394), (624), (957), (1163)
banana, virus-free rhizomes produced by heat treatment, 320
Banko, T. J., 899
Barber, A., 578
Barham, R. O., 1260
Barker, K. R., (767)
barley
bromegrass mosaic virus on, RNA polymerase activity in, 446
Erysiphe spp. on, role of nonhost in infection process, 364, **367-371**
barley stripe mosaic virus
on corn, aberrant ratio genetic effect of, 64, **66**
Poa semilatent virus related to, 128, **130**
symbiosis in barley, 342
Barlow, J. C., (1122)
Barss, R. H., 12
Bartz, J. A., 731, 1290
Basham, H. G., 578
Bashi, E., 1035
basic copper sulfate (see **fungicides**, specific)
Bateman, D. F., (578), (779)
bean (see also **Phaseolus vulgaris** and under genera of)
rust on, epidemiology in semi-arid habitats, 1035
bean common mosaic virus
on bean, reduced sensitivity to ozone, 383
distribution pattern in bean seed, 269
on mungbean, natural infection, 1209, **1210**, **1213**
strains of, environmental effects, 679, **681**
bean yellow mosaic virus, on red clover, hypersensitivity to, 161
Beckman, C. H., (290), 1214
Beer, S. V., 578
beet (see **sugarbeet**)
Beland, J. W., (602)
Bell, A. A., (1297)
Bell, D. K., 241
Belladonna mottle virus, on Physalis heterophylla, in Iowa, strain of, 44, **46**
Beniwal, S. P. S., 1197
benomyl (see **fungicides**, specific)
Benson, D. J., 38, 957, 1163
Ben-yephet, Y., 51
benzimidazole (see **fungicides**, specific)
Berbee, J. G., (411)
Berg, C. C., (589)
Berg, L. A., 320
Berger, R. D., 767
Bergquist, R. R., (436), 645
Berry, C. R., 207
Beta vulgaris (see **sugarbeet**)
Beute, M. K., 263, 571, (1294)
Bianchini, R., (768)
Bidens pilosa, bacilliform virus transmission in, 840, **842**, **843**
Bilbrey, R. M., (452)
biological control
Puccinia chondrillina for control of Chondrilla juncea, 253
wheat root rot, bacteria ineffective in, 97
Bipolaris setariae, on Panicum, leaf blight of, 476, **477**, **478**
Bird, G. W., 48, (1421)
Bird, J., (581), (582)
Black, L. M., (1040)
Blair, R. L., 761
Blanchard, R. O., 578
Blazquez, C. H., 443
Bloom, J. R., (579)
Bloomberg, W. J., 1153
Blowers, D. R., (649)
blueberry (see **Vaccinium** corymbosum)
bluegrass (see **Poa** pratensis)
Body, D. E., (132)
Bolkan, H. A., 513
Boller, R. A., 17, 121, 283
Boothroyd, C. W., 579, (579)
Botryosphaeria dothidea
on peach, gummosis caused by, 1429, **1430**, **1431**
on Pieris japonica, symptoms on, 1368
Botrytis
allii, on onion, relation to nuclei of cells and wounding, 1010
cinerea
on onion, interaction with Alternaria, 1128
in Vicia faba, epidermis penetrated by, 461, **463**, **465**, **466**
Bourne, C. E., (1269)

Bowman, T., (985)
Bowyer, J. W., 346
Boyle, J. S., (714), 766
Brassica
campestris and napus, Albugo cruciferarum, yield loss from stem infection, 408
nepobrassica, oleracea botrytis, oleracea capitata, Heterodera schachtii on, crop losses vs. population density, 549
Braun, A. J., 10, (11)
Brener, W. D., (675)
Brennan, E., (578), (584)
Bricker, J. L., (1007)
broad bean wilt virus, serotypes of, isolation and identification, 1547
bromegrass mosaic virus, RNA polymerase in extracts of leaves from, 446, **450**
Brown, C. M., (452)
Brown, G. E., 539
brown stem rot, on soybean, factors affecting, 94, **95**
Bruckart, W. L., 579
Buchenauer, H., (485)
Buddenhagen, I. W., (273), (1182)
Bugbee, W. M., 706, 1258
Burke, D. W., (526), 546
Burpee, L. L., 579, (581)
Burton, C. H., (1380)
Busch, R. H., (184)
Bustamante, M., (320)
Butler, E. E., (513)
Butterfield, E. J., (22)

cadmium, phytotoxic effects of, 578
Cajanus cajan, witches' broom of, in Puerto Rico, 582
Caladium hortulanum
dasheen mosaic virus on
tissue culture of, 237, **238**
yield effect of, 768
Calavan, E. C., (346), (1309)
Caldwell, R. W., 752
Callihan, R. H., (1404)
Callistemon viminalis, Sphaeropsis gall of, 1001, **1002**
Calonectria spp., ascospore discharge from, 567
crotalariae
on blueberry, histopathology, 1228, **1229**
blueberry stem and root rot caused by, 831
Calpouzos, L., (158)
Campbell, R. N., 210, (432)
Capsicum
annuum
bacteria population decline under light, 770
bacterial leaf spot of, H_2O_2 not involved in, 793
Erwinia carotovora on, fruit tolerance in lines of, 1290
population decline in light, 770
virus diseases of, in El Salvador, 768
Xanthomonas on, hypersensitivity in, 731
frutescens
damping-off of, effect of diphenamid on, 1186
Phytophthora capsici on, ultrastructural changes in cells of, 1084, **1085-1088**
captan (see **fungicides**, specific)
carboxin (see **fungicides**, specific)
Carica papaya
Corynespora cassiicola on, host specific isolates of, 1364
Phytophthora palmivora on
dispersal by rain, 202
zoospore motility vs. disease severity, 426
carnation yellow fleck virus, characteristics, purification, and hosts, 979, **980, 981, 983**
Carothers, Z. B., (834)
carrot
motley dwarf virus of, seed transmission, 151
Xanthomonas carotae on, factors affecting blight in, 746
Carya illinoensis, pecan bunch disease of, mycoplasmalike organism associated with, 1269, **1270, 1271**
cassava (see **Manihot esculenta**)
Castanea dentata, chestnut blight of, methyl-benzimidazole carbamate for control of, 1471, **1472**
Cavariella aegopodii, vector for motley dwarf virus on carrot, 151
celery, nematodes on, yield loss vs. population density, 1072
Cephaleuros virescens, on lime, biocontrol in Florida, 768
Cephalosporium gregatum, on soybean, factors affecting stem rot from, 94, **95**
Ceponis, M. J., (1459)
Ceratocystis
fagacearum
longevity in ammate-treated oak roots, 1483
nonsurvival of, in beetle frass, 1528
ulmi (see also **Dutch elm disease**)
in elm
benomyl and methyl-benzimidazolecarbamate hydrochloride for control of, 1231
nodal cavities in, 290, **292**
on Ulmus spp., clones resistant to, 675
variability in pathogenicity and culture, 585
Cercospora
arachidicola
benomyl and related fungicide tolerance to, 1377
on peanut
computerized forecasting method for, 385
tolerance to benomyl and related fungicides, 1468
fuligena, on tomato, leaf mold caused by, new in USA, 443, **444**
omphakodes, in Phlox divaricata, symptoms and nutrient relations, 1108
Cercosporidium personatum, on peanut, tolerance to benomyl and related fungicides, 1468
Chan, M. J., (1307)
Chandler, W. A., 1281, (1284)
Chang, H.-S., 158
charcoal rot (see **Macrophomina** phaseolina)
chemotaxis, Pseudomonas in bean leaves, flagellar motility role, 1389
Cheo, P. C., (763)
cherry rasp leaf disease, origin, cause, host range in North America, 721
chestnut blight, chemical control of, 1479, **1480**
Chevalier, J., (1154)
Chondrilla juncea, Puccinia chondrillina on, biological control in, 253
Chou, C. K., 335
Christie, R. G., (840)
Christie, S. R., 840
chrysanthemum, Verticillium infection, factors affecting, 582
Chrysanthemum morifolium
Erwinia chrysanthemi on, histopathology of, 584, 1344, **1346-1351**
peroxyacetyl nitrate affecting eight cultivars of, 897
Verticillium dahliae on, anatomy of, 578
Cicer arietinum, wilt and root rot of, in California, 432
citrus, Mycosphaerella citri on leaves of, factors affecting, 115
Citrus spp.
exocortis virus on, metabolic changes in, 196
mycoplasmalike organism on, antibiotics for, 346

paradisi, ringspot and psorosis viruses in, relationship, 389, **390-392**
sinensis
benomyl residues in fruit of, 539
green mold of, thiabendazole effect on, 1469
citrus psorosis virus, relation to citrus ringspot virus, 389, **390-392**
citrus ringspot virus, necrotic strain of, relation to citrus psorosis virus, 389, **390-392**
citrus stubborn disease
antibiotics for, 346
mycoplasmalike organisms associated with, cellular morphology and reproduction, 1309, **1310**, **1311**
Civerolo, E. L., 1248
Cladosporium
cucumerinum, on cucumber, screening for resistance to, 565, **566**
herbarum, on onion, interaction with Alternaria, 1128
Clark, E. M., 1468
Clark, M. C., (1015)
clover phyllody, mycoplasmalike organisms associated with, 1156, **1157**
clover, red- (see **Trifolium pratense**)
clubroot (see **Plasmodiophora brassicae**)
Cochliobolus sativus, on wheat, bacteria not antagonistic to, 97
cocoa necrosis virus, purification of, properties, 1325
coconut (see **Cocos nucifera**)
Cocos nucifera
lethal yellowing disease of, mycoplasmalike association, 667, **668-673**
lethal yellowing in, symptom remission by tetracycline, 307
Coffea arabica (see **coffee**)
coffee
fungicides for, quality effect, 769
leaf rust of, pyracarbolid for control of, 147, **148**
rust of, self-inhibitor in uredospores of, 71
Cohen, S., (632)
Cohen, Y., (711)
Cole, H., Jr., (331), (354), (581), (583), (584), (1139)
Colletotrichum
gloeosporioides, on yam, fungicides for, 769
graminicola
on corn
pathogenicity and host range, 293, **294**
tillage practices affecting, 168
trifolii, dissemination and survival in field, 57
truncatum, on soybean, seed infection, 154, **155**
Coniophora cerebella, effect of copper-chromium-arsenate on, in wood, 335
Conroy, J. J., 1118
Contreras, M. R., 579
Conway, W. S., 579
Cook, A. A., (731)
Cook, R. J., (358)
copper, accumulation by trees and soil, 588
Corbett, M. K., (971)
Corden, M. E., (586)
corn
Aspergillus infections, 797
barley stripe mosaic virus of, aberrant ratio genetic effect, 64, **66**
Colletotrichum graminicola on, pathogenicity and host range, 293, **294**
Diplodia zeae on, stalk rot vs. Helminthosporium leaf blights, 1496
Helminthosporium leaf blight of, epidemiology in, 168, ((572))
Helminthosporium maydis on
epidemic modeling of, 583
eradication in popcorn seed, 757
histological observations, 579
infrared fluorescence from infection, 615, **617**, **618**
resistance measured by punch inoculation, 429
spore removal from, 1136
sporulation affected by humidity, 582
temperature, moisture, and fungicide effects on, 619
Helminthosporium maydis race T on, air sampling to detect spores of, 41
Helminthosporium turcicum on
inheritance of virulence in, 1150
leaf penetration, 1475, **1476**
maize dwarf mosaic and maize chlorotic dwarf viruses in Ohio, epidemiology of, 1455
maize dwarf mosaic virus
and Helminthosporium maydis race T relations, 1197
related to aphid numbers, 639
root rot complex of, nematode-fungus relation, 14
spiroplasma on, relation to Spiroplasma citri, serology, 583
Trichometasphaeria turcica on
genetic relations, 436
races of, in Hawaii, 645, **646**
corn stunt, inoculation periods with vector, 767
Corylus avellana, bacterial blight of, stress predisposition to, 1537
Corynebacterium insidiosum
on alfalfa
glycopeptide toxin from, 194, **195**
pseudomonads and Erwinia associated with, 865
Corynespora cassiicola
host specificity of Nigerian and North American isolates of, 1364
on Ligustrum sinense, leaf spot and control, **255**
cotton
aflatoxin production in seed of, systems analysis approach, 1451
Aspergillus vs. insects in bracts and foliage, 1502, **1504**, **1505**
Aspergillus flavus on, aflatoxin production from, 452
Aspergillus flavus boll rot in, detection by fluorescence, 326
boll rot in
relation to insects and Aspergillus, 259
by Thanatephorus cucumeris, 107, **108-110**
Corynespora cassiicola on, host specific isolates of, 1364
endomycorrhizae of, relation to nematicides, 48
histochemistry of seedling roots, gossypol and terpenoids in, 1297, **1299**
Pythium irregulare on, growth and yield affected by, relation to other soil pathogens, 1303
Rhizoctonia solani on, virulence repressed by glucose, 985
systemic fungicides for, oil effect on uptake and translocation, 490
Verticillium albo-atrum
microsclerotial survival in soil, 1159
in soils of, 563
Verticillium wilt of
new resistance source, from USSR, 931, **934**
oil emulsion effect on benomyl and thiabendazole use, 485
resistance to, potential of multiline cultivars, 924, **925**, **926**
vesicular-arbuscular mycorrhizae associated with, 1421
wilt of, Verticillium propagules in soil in relation to, 22
Cowling, E. B., (761)
cowpea (see **Vigna sinensis**)

cowpea chlorotic mottle virus
in cowpea, multiplication, inactivation, and particle breakdown, 951
RNA in, inhibition by polyphenol-polyphenol oxidase, 35
cowpea mosaic virus, wild hosts for, 767
Coyier, D. L., 246
Crane, P., (797)
Crill, P., (1507)
Cristulariella pyramidalis
conidiophore morphology in, moisture effects, 1255, **1256**
temperature and moisture effect on, 635
Cronartium
fusiforme
on oak, 21 spp. tested for susceptibility to, 400
on pine, monoterpene relation, 976
on Pinus taeda
artificial vs. natural inoculation, 760
factors affecting, 761
quercuum, on oak, 21 spp. tested for susceptibility to, 400
ribicola
axenic culture of, mononucleate stage, 1028, **1029**, **1031**, **1033**
on pine, invasion mechanisms, host pathogen interactions, **1541-1544**
on Pinus monticola, pectinase activity of, **1287**
Crosby, F. L., (385)
crucifers, seedling diseases of, ecology and control, 692
Cryptococcus lutelous, on onion, interaction with Alternaria, 1128
cucumber
Cladosporium cucumerinum on, screening for resistance to, 565, **566**
Corynespora cassiicola on, host specific isolates in, 1364
Erysiphe spp. on, role of nonhost in infection process, 364, **367-371**
cucumber mosaic virus
on tobacco, ultrastructure of mesophyll protoplasts in, 30, **31-33**
on tobacco leaves, electron microscopy of, 534, **535**, **537**, **538**
weed hosts in New York, 579
Cucumis melo, methyl-benzimidazole carbamate applied to, metabolic fate of, 1513
Cucurbita spp., virus in, characteristics of, 579
maxima, Fusarium solani cucurbitae on, root exudate and virus-fungus interaction, 994
pepo, Aspergillus spp. in stored seeds of, 1339, **1342**
Cunfer, B. M., 123
Cuppels, D., 468
curly top virus
on bean, temperature vs. resistance, 825
purification of, 136, 140
Curtis, L. R., 579
Cyamopsis tetragonoloba, root-knot nematode on, resistance to, 1533, **1534**
Cylindrocladium spp., on Rhododendron, leaf abscission anatomy, 580
crotalariae
on blueberry, histopathology, 1228, **1229**
on peanut, factors affecting seed decay in soil by, 241
on peanut roots, microsclerotia formation and dispersal in, 1294, **1295**
scoparium, on azalea, abscised leaf role in epidemiology of, 481, **482**
theae, on azalea, epidemiology in wilt of, 481
Cytospora cincta
on Italian prune, relation to ringspot virus, 1410
on Prunus persica, induced changes in stems of, 899
Czabator, F. J., (602)
Dabek, A. J., (307)
Dactylis glomerata, Stagonospora arenaria on, varietal resistance to, 589
dahlia mosaic virus, DNA in, 287
Dahmen, H., (364)
Daines, R. H., 1459
Dalbulus maidis, vector of corn stunt, inoculation periods, 767
Dale, J. L., (1485)
Damann, K. E., Jr., 652
damping-off
pepper and tomato, effect of diphenamid on, 1186
on radish

fungicides (general) (see also **fungicides**, specific)
benzimidazole configuration, Sclerotinia tolerance to, 1139
clubroot of crucifers controlled by, 16 compounds, 173
computerized forecasting for Cercospora leafspot of peanut, 385
fungitoxic effect of wood preservatives, 335
leaf spot of Ligustrum sinense controlled by, 255
potato scab affected by, other factors related to, 1404
role in epidemiology with host resistance, 580
in soil, movement of, 1091
southern corn leaf blight controlled by, 619
systemic-
effect on citrus stubborn disease, 346
oil effect on uptake and translocation in cotton, 490
Ustilago maydis controlled by, 580
tomato fruit rot controlled by, 1204
Venturia inaequalis sporulation inhibited by, 587
on wheat, symptomless effects, 812
fungicides (specific) (see also **fungicides**, general)
ammonium sulfamate, for oak wilt, effect on longevity of Ceratocystis, 1483
basic copper sulfate, apple canker control by, factors affecting, 300
benomyl
bronzing in beans reduced by, 579
Cercospora arachidicola tolerant to, 1377
Cercospora and Cercosporidium tolerance to, in peanut, 1468
for Dutch elm disease control, 1231
ozone injury to tobacco affected by, 814
residues of, in Valencia oranges, postharvest application, 539
in soil, microbial activity affected by, 857
Ustilago hordei, genetics of tolerance to, 51
Verticillium malthousei tolerance to, 331
Verticillium wilt of cotton controlled by, role of oil, 485
benzimidazole, distribution after pear tree injection, 963, **965**
captan, tomato fruit rot controlled by, 1204
carboxin
ozone injury to tobacco affected by, 814
Ustilago hordei, genetics of tolerance to, 51
difolatan, apple canker control by, factors affecting, 300
dodine, apple scab control, ascospore tolerance to, 649
hydroxymethylisoxazole, absorption and metabolism of, biological activity, 1273
methyl-2-benzimidazolecarbamate hydrochloride for chestnut blight control, 1479, **1480**
Dutch elm disease control, 1231
methyl benzimidazolecarbamate
for chestnut blight control, 1479, **1480**
in melon plants, metabolic fate of, 1513

oxathiin analogs, bronzing in beans reduced by, 579
PCNB, for Rhizoctonia solani on radish, epidemiology, 38
pyracarbolid, for coffee leaf rust, 147, **148**
thiabendazole
green mold of orange controlled by, 1469
Verticillium wilt of cotton controlled by, role of oil, 485
triarimol, for mummy berry of blueberry, 222
fungistasis
substance in soil, factors affecting, 1042
volatile factor in soil, abiotic generation of, 624
volatile substance in alkaline soil, 1398
Fusarium spp.
on alfalfa, pseudomonads and Erwinia associated with, 865
on alfalfa roots, interaction with bacteria, 1169
hydroxy-methylisoxazole effects on rice, cucumber, and tomato in soil, 1273
moniliforme, nematode related to, in corn root rot, 14
oxysporum
on Douglas-fir seedlings
protection by mycorrhizae, 586
treatment timing in control, 1153
endopolygalacturonase isomers from, 586
seedling diseases of crucifers, ecology and control, 692
on tomato, resistance to races of, 1507
oxysporum ciceri, on Cicer arietinum, 432
oxysporum cubense, host resistance related to cell wall membrane stabilization, 1214, **1217**
oxysporum lycopersici, on tomato, resistance factors, 455
oxysporum pisi, races of, in pea wilt, 849
roseum
blight of bluegrass caused by, 354
seedling disease of crucifer, ecology and control, 692
on winter wheat, relation to water stress and cultural practice, 358
roseum 'Avenaceum', macroconidium surface moieties, 394, **396**, ((572))
solani
on avocado fruit, effect on ripening, 188
on Liriodendron tulipifera, histochemistry of, 414, **415**, **416**
on peas, resistance related to exudates, 190
seedling diseases of crucifers, ecology and control, 692
on sugar maple
canker vs. temperature, 1018
epidemic in Pennsylvania, 1024
solani cucurbitae, on squash, relation of virus, fungus, and hypocotyl exudate on stem rot, 994
solani phaseoli
on bean, soil bulk density and water potential effect on, 526, **528**, **529**
macroconidia of, surface moieties, 394, **398**, ((572))
solani pisi
on Cicer arietinum, 432
germination in pea spermosphere, 558
on pea, pisatin relation to lesions, 1443
tricinctum, blight of bluegrass caused by, 354

effect of ozone and SO_2 on needles of, 207
fusiform rust on
artificial vs. natural inoculation, 760
factors affecting, 761
virginiana, effect of ozone and SO_2 on needles of, 207
Pirone, T. P., (1133)
pisatin (see **phytoalexin**)
Pisolithus tinctorius, on pine, relation to nematodes and Phytophthora, 1260
Pisum sativum (see **pea**)
Pittman, U. J., (408)
Plasmodiophora brassicae, on crucifers, races, pathogenicity, and control of, in Ontario, 173
Plasmopara halstedii, on sunflower, races in America and Europe, 1465
Poa
annua, ozone injury, induced by benomyl and thioallophanate-ethyl, 584
pratensis
Fusarium blight of
fungicides vs. nematicides, 581
symptoms in seedlings and mature plants, 354
Podosphaera leucotricha, heterothallism in, on apple, 246
Politis, D. J., (293)
pollution, air-
economic impact on vegetation in New Jersey, 584
fluoride injury, relation to aluminum smelter, 583
N, oxide, and SO_2, forest tree spp. affected by, 773
oxidant and winter fleck injury, pine needles of, histopathology, 801, **802, 804, 805**
ozone
bean leaf injury and senescence inhibited by phenylurea, 587
bean resistance to, cholesterol and steroid effects, 586
on buckwheat and bean, effect of dust, 588
effect on Virginia, shortleaf, slash, and lobolly pines, 207
indicator plant response to, in Georgia, 1122
injury reduced by benomyl and thioallophanate-ethyl, 584
pollen exposed to, ultrastructural changes in, 257, **258**
resistance in, tobacco seedlings vs. mature plants, 1047
sensitivity on bean reduced by virus, 383
soybean affected by, 132
tobacco affected by, reduction by fungicides, 814
on tomato, Pyrenochaeta relation, 582
peroxyacetyl nitrate, chrysanthemum affected by, 897
SO_2
on buckwheat and bean, dust effects on, 588
effect on Virginia, shortleaf, slash, and loblolly pines, 207
leaf absorption of, 585
soybean affected by, 132
polygalacturonate lyase (see **enzymes**, specific)
Polyporus
dryophilus, basidiospore germination of, CO_2 effects, 153
hispidus, on oak, spore dispersal reduced by felling, 265
versicolor, effect of copper-chromium-arsenate on, in wood, 335
Poneleit, C. G., (293)
Populus tremuloides
Hypoxylon canker of
ascospore, conidia, and toxin role, 654
environmental factors, 658
Hypoxylon pruinatum on
culture variation in, 663
factors influencing pillar production and conidial germination in, 411
Poria spp., effect of copper-chromium-arsenate on, in wood, 335
monticola, in pine, effect of wood preservative on cell organelles, 335, **338**
Porter, D. M., 249, 263
potato
bacteria isolated from, soft-rot cause, 468
bacterial wilt and late blight of, field tests for resistance, 768
diseases in Peru, 769
hemolysins in plants of, virus relation, 714
Phytophthora infestans and Alternaria porri on, epidemiology in semi-arid habitats, 1035
scab of, irrigation and soil treatments related to, 1404
Verticillium and Pratylenchus penetrans on, interaction, 579
yield affected by foliar sprays and soil fumigation, 860
potato spindle tuber virus, on Scopolia sinensis, Mn effect

on, 1015, **1017**
potato virus M, in bean, bioassay factors, 807, **808**
potato virus X, ultrastructure of lesions produced by, cytological events, 784, **785-791**
potato virus Y, RNA of, isolation and properties, 1115
Potter, J. W., (549), 1072
Pountney, E., (807)
Powell, C. C., (1081)
Powelson, R. L., (145)
Prasad, K., 948
Pratylenchus spp., on corn, relation to Fusarium infection, 14
brachyurus, soil population affected by nematicides, 48
penetrans
population densities in, yield loss in vegetables, 1072
on potato, interaction with Verticillium, 579
variance of, effect on peas, 587
Preston, R. D., (335)
Pritchard, D. W., 757
protease (see **enzymes**, specific)
Provvidenti, R., 1448, (1547)
Prunus
domestica
Prunus ringspot virus on, relation to Cytospora-resistance, 1410
ringspot virus of, effect on growth and productivity, 1179
persica (see also **peach**)
cytospora-induced changes in stems of, 899
perennial canker of, role of twig infection, 683, **684**, **688**
phony peach disease in, rickettsialike bacteria associated with, methods, 260
Prunus ringspot virus
Cytospora-resistance related to, 1410
growth and productivity of prune trees affected by, 1179
Prusky, D., 812
Pseudomonas spp.
in cotton fibers, fluorescence in, 326
mushroom mummy disease association, 1473
cepacia, on onions, leaf infection, 1440, **1441**, **1442**
fluorescens, growth affected by O_2 and CO_2, 1012
glycinea
on soybean
flower inoculation in, 329
population changes in germinating seeds of, 1477
mangiferaeindicae, on mango, bacterial black spot caused by, 1400
marginalis
on alfalfa, root discoloration from, 865
on carrot and potato, soft rot from, 468
marginalis alfalfae, microbial interaction on alfalfa roots, 1169
marginata, on gladiolus, interaction with root knot nematode, 271, **272**
phaseolicola
Achromobacter synergistic with, 277
bean leaves invaded by, role of flagella, 1389
mutant of, UV-induced, 590
pisi, on tobacco, hypersensitive reaction in, quantitative relation, 885, **887**, **889**
solanacearum, in tomato, recovery from, 468
syringae
on peach
effect of peach soil leachates on, 1281
temperature vs. old and new peach soil effect on, 1284
survival on vetch, relation to brown spot of bean, 1330
Pseudotsuga menziesii, Fusarium root rot of, mycorrhizal protection in, 586
Puccinia
arachidis, on peanut, germination inhibitors in, 990, **991**
chondrillina, on Chondrilla juncea, use in biological control of, 253
graminis tritici
computer-generated genotypes for pathogenicity, 1380
germination and infectivity in, tobacco smoke effect, 1143
resistance of triticale, wheat, and rye to, 266
spore germination in, pregermination environments for, 1244
uredospore germination of
inhibition by light, 158
reversal by self-inhibition, 901
on wheat, inheritance in mildew differential, 1105
recondita, spore germination in, pregermination environments for, 1244
recondita tritici, axenic culture of, methods for, 262
striiformis, spore germination and infectivity of, tobacco smoke effects on, 1143
Pueppke, S. G., 1433
Purcifull, D. E., (418), (1322)
pyracarbolid (see **fungicides**, specific)
Pyrenochaeta
lycopersici, on tomato, relation to ozone, 582
terrestris, from soil, isolation and identification of, 275, **276**
Pyrenophora trichostoma, on wheat, losses from, 184
Pyricularia oryzae
on rice, temperature effect on lesions and sporulations, 828
spore germination and infectivity of, tobacco smoke effects on, 1143
Pythium spp., hydroxymethylisoxazole effects on, in rice, cucumber, and beets, 1273
aphanidermatum
on bean, histopathology, 373, **374**, **376**, **378**
relation to Heterodera on sugarbeet, 380
debaryanum, on soybean, seed rot caused by, 1445
graminicola, on bentgrass, leaf blight from, 252
irregulare
on cotton, growth and other soil pathogens related to, 1303
seedling diseases of crucifers, ecology and control, 692
myriotylum
on peanut
associated with southern corn rootworm injury, 249
moisture effect on pod rot, 317
seed decay of, factors affecting in soil, 241
torulosum, on bentgrass, leaf blight from, 252
ultimum
on Cicer arietinum, 432
on peas, resistance related to exudates, 190
on soybean seeds, rot of, 1445
synergism with Heterodera on sugarbeet, 380
vanterpoolii, on bentgrass, leaf blight from, 252

Quercus spp.
Ceratocystis fagacearum on
longevity of, in ammate treated roots, 1481
nonsurvival in beetle frass, 1528
Cronartium spp. tested for susceptibility to, on 21 spp., 400
borealis maxima, Fomes canker of, 1148
phellos, Polyporus hispidus on, spore dispersal reduced by felling, 265
rubra, wood decay in, electric current measurements in, 1375

radish
Rhizoctonia damping-off in, epidemiology, 957, 1163
Rhizoctonia solani of, epidemiology influenced by PCNB, 38
Rahat, M., (1469)
Rajaram, S., (266)
Raju, P. N., (1413)
Rama Raje Urs, N. V., 542
Rambo, G. W., 797

Rand, R. E., (1330)
Rauscher, K. J., 702
Rawn, C. D., 905
Raymundo, S. A., 262
Renwick, J. A. A., (901)
resistance
alfalfa to wilt, use of toxin in screening, 194, **195**
barley to barley stripe mosaic, symbiosis of, 342
barley and cucumber, nonhost plants for powdery mildews, 364, **367-371**
cassava to bacterial blight, 83
corn to Helminthosporium maydis, punch-inoculation method for, 429
cotton to Verticillium wilt, USSR source, 931
cucumber to Cladosporium cucumerinum, screening method, 565, **566**
oaks to Cronartium spp., 21 spp. tested, 400
pepper to bacterial soft rot, 1290
Phaseolus vulgaris to watermelon mosaic virus to, inheritance, 1448
pine
to dwarf mistletoe, 689
to fusiform rust, monoterpene relation, 976
red clover
to bean yellow mosaic virus, 161
to rust, 758
soybean
to downy mildew, histology of infection, 522
to Phytophthora megasperma sojae, histopathology, 971, **972-974**
to seed and seedling rot, 1445
sunflower to downy mildew, races in America and Europe, 1465
tomato
to Fusarium oxysporum lycopersici, factors affecting, 455
to Fusarium wilt, races, 1507
to tomato yellow leaf curl virus, 632, **633**
wheat
to root rot, biocontrol ineffective in, 97
to stem rust, 1105
wilt diseases to Fusarium, relation to phenols, 1214
Reyes, A. A., 173
Rhizoctonia sp., hydroxy-methylisoxazole effects on rice, in soil, 1273
solani (see also **Thanatephorus cucumeris**)
on Cicer arietinum, 432
on cotton
bolls infected by basidiospores, 107
virulence repressed by glucose, 985
damping-off of pepper and tomato caused by, herbicide effect on, 1186
epidemiology of, in radish, 957
growth rates in isolates of, 88, 1220
heterokaryosis and virulence in, 513, **516, 517**
on pea, pisatin relation to lesions, 1433
on radish
damping-off epidemiology, 1163
epidemiology influenced by PCNB, 38
seedling diseases of crucifers, ecology and control, 692
rhizosphere
bacteria in, wheat root rot not affected by, 97
pH and N concentration, relation to take-all of wheat, 822
Rhododendron sp.
Calonectria spp. on, ascospore discharge in, 567
Phytophthora root rots of, prevalence and virulence in, 1371
obtusum, Cylindrocladium spp. on, leaf abscission anatomy, 580
rice
Aspergillus parasiticus on
aflatoxin produced in, temperature effects, 283
grains of, aflatoxin production in, 17
bacterial blight of, interaction of bacteria, 1182
Hypsoperine n. sp. (?) on, 767
planting date and disease in Venezuela, 767
Pyricularia oryzae on, temperature effect on lesions and sporulations, 828
Sclerotium oryzae on
severity related to N fertilization, 178, **179-182**
viability of sclerotia affected by temperature and moisture, 1499
Xanthomonas oryzae on, method for detection in seed, 273
Rich, A. E., (579), (580), 1482
Rich, J. R., (48), 1421
Rich, S., (429), (587), (814)
Richards, B. L., Jr., 1482
Ricinus communis, root-knot nematode on, resistance to, 1533, **1534**
Ridings, W. H., (1001)
Rickettsiae, in phloem of Sida cordifolia, 581
rickettsialike organism, phony peach disease associated with, on peach, 260

Sneh, B., 275
Snow, G. A., 602
soil-borne propagules, spatial distribution of, model for, 145
soil moisture, peanut pod rot affected by, 317
Soine, O. C., (1258)
Solanum
melongena, Corynespora cassiicola on, host specific isolates of, 1364
tuberosum (see **potato**)
Solel, Z., (963)
Sonchus oleraceous, bacilliform virus transmission in, 840, **842**, **843**
Sonenshine, D. E., 1060
Sood, P. N., 1244
sorghum, maize dwarf mosaic virus and Helminthosporium maydis race T relations, 1197
Soto, C. A., 769
southern bean mosaic virus, cowpea strain of, new in Ghana, 1100
southern corn leaf blight (see also **Helminthosporium** maydis)
remote sensing of, 615
temperature, moisture, and fungicide applications for, 619
soybean
bacterial blight of, flower inoculation, 329
brown stem rot of, factors affecting development of, 94, **95**
charcoal rot of, factors affecting, 845
Colletotrichum truncatum on seedcoat of, 154, **155**
Corynespora cassiicola on, host specific isolates of, 1364
Diaporthe phaseolorum sojae on, fungicidal seed treatment for, 580
Macrophomina phaseolina on, tissue effects, 156, **157**
ozone and SO_2 injury to, in field, 132
Peronospora manchurica on, histology of isolines, 522
Phytophthora megasperma sojae on
histology of resistance, 971, **972-974**
host-parasite ultrastructure, 834, **835-838**
Pseudomonas glycinea on, population changes in, 1477
root knot nematodes on, fumigation related to yield effect, 219, **220**
seed rot of, relation to exudates and host resistance, 1445
tobacco streak virus in, seed transmission, 112
Xanthomonas phaseoli sojensis on, activity affected by horseradish peroxidase, 542
Sphaeropsis tumefaciens, on Callistemon viminalis, new host for, 1001, **1002**
Spinacia oleracea, Heterodera schachtii on, crop losses vs. population density, 549
Spiroplasma citri
antibiotic sensitivity to, 346
citrus stubborn disease associated with, 1309
serological relationships with corn stunt spiroplasma, 583

spore germination
mathematical model of, temperature effect in Alternaria, 605
Polyporus dryophilus basidiospores, CO_2 effects, 153
Puccinia graminis tritici, effect of light and soaking, 158
Sykes-Moore chamber method for studying, 903
tobacco smoke effects on fungus spore germination and infectivity, 1143
Sporobolomyces roseus, on onion, interaction with Alternaria, 1128
Spotts, R. A., 586

tobacco (see also **Nicotiana glutinosa**)
Alternaria infection, brown-pigment formation, 738
cucumber mosaic virus on, electron microscopy of, 534, **535**, **537**, **538**
mesophyll protoplasts of, ultrastructure of, from cucumber mosaic, 30, **31-33**
ozone injury in, injury prediction, 1047
Pseudomonas pisi on, hypersensitivity in, quantitative relation, 885, **887**, **889**
tobacco etch virus
amorphous inclusion bodies in, hosts infected by, 1234, **1237**, **1238**, **1240**
nuclear and cylindrical inclusions, antigenic specificity, 418
tobacco mosaic virus
on tobacco, tissue culture studies, 1520, **1522**, **1523**
on white ash, properties of strain from, 1490, **1493**, **1494**
tobacco ringspot virus
from geranium, factors affecting symptoms and recovery of, 588
tomato ringspot virus related to, and Tetranychus urticae, 494
tobacco streak virus
on Datura stramonium, relation to D. quercina virus, 1322, **1323**

in soybean, seed transmission of, 112
tobacco vein-mottling virus, on tobacco, new pathogen of, properties, 1133, **1134**
Tolin, S. A., (1133)
tomato
Aspergillus spp. in stored seeds of, 1339
bacterial canker of, fungicides for, 767
blackmold of, factors affecting spore germination in, 584
Corynebacterium michiganense on, fungicides for, 767
Corynespora cassiicola on, host specific isolates, 1364
damping-off of, effect of diphenamid on, 1186
fruit rots in, etiology and control, 1204
Fusarium oxysporum resistance in, factors affecting, 455
Fusarium wilt of, susceptibility of cultivars to, 1507
leaf mold of, new in USA, 443, **444**
nematode and fungus interaction in roots of, controlled inoculum, 1118
Stemphylium botryosum on, epidemiology in semi-arid habitats, 1035
tomato yellow leaf curl virus on, resistance to, 632, **633**
tomato ringspot virus
in grapevine, phloem necrosis and stem-pitting symptoms associated with, 588
tobacco ringspot virus and Tetranychus urticae related to, 494
Tomlinson, H., 587
Toole, E. R., (265)
Tosic, M., 312, 439
Townsend, A. M., (585)
toxin (see also **phytoalexin**)
aflatoxin
from Aspergillus flavus-infected cottonseed, lint fluorescence in, 452
in preharvest corn, 797
on rice
competition of Aspergillus spp. in, 121
relative humidity effect on production of, 17
temperature effect on rice, 283
glycopeptide, from Corynebacterium insidiosum on alfalfa, 194
triarimol (see **fungicides,** specific)
Trichodorus christiei
Meloidogyne and Verticillium interactions with, on tomato, 1118
soil population affected by nematicides, 48
Trichometasphaeria turcica (see also **Helminthosporium** turcicum)
host-specific forms of, heterokaryosis in, 436
races in f. sp. of, in Hawaii, 645
Trifolium pratense
bean yellow mosaic virus on, hypersensitivity in, 161
nodulation of, influence by metals, 583
Trione, E. J., 1531
triticale, stem rust of, from rye and wheat hosts compared, 266
Triticum aestivum (see **wheat**)
Troiano, J., 587
Truman, R., 143
Tsai, S., (490)
Tseng, T. C., 229
Tu, C. C., 1510
Tuite, J., (752), (797)
turf grasses, yellow tuft of, electron microscope studies, 584
Turner, J. G., 885
Tylenchorhynchus sp., hydrolytic enzymes effect on, 583
claytoni, on pine, relation to Phytophthora and Pisolithus, 1260
martini, on corn, relation to Fusarium root rot, 14
Typhula idahoensis, on wheat, nuclei in spores and hyphae of, incompatibility, 123, ((572))

Ulmus
americana (see also **elm**)
Dutch elm disease of
benomyl and methyl-benzimidazolecarbamate hydrochloride for control, pressure injection, 1231
resistant clones to, 675
Verticillium albo-atrum on, clone response to, 702
laevis, Dutch elm disease on, clones resistant to, 675
ultrastructure (see also **electron microscopy**)
pecan bunch disease, mycoplasma association in, 1269, **1270, 1271**
Phytophthora capsici on Capsicum frutescens, cell changes in compatible interactions, 1084, **1085-1088**
Phytophthora megasperma sojae on soybean, host-parasite interface, 834, **835-838**
potato virus X, cytological events, 784, **785-791**
tobacco mesophyll protoplasts, from cucumber mosaic virus infection, 30, **31-33**
Uromyces
phaseoli
benomyl for systemic control of, 814, **816**
DNA synthesized by, 586
epidemiology in semi-arid habitats, 1035
on Phaseolus vulgaris, cold therapy for, 1044
uredospore germination on membranes, ribosomal activity in, 1111
virus particles in, electron microscopy of, 1111, **1113**
trifolii fallens, on red clover, resistance to, 758
Ustilago maydis, systemic fungicides for control of, 580
Uyemoto, J. K., 588, (1547)

Vaccinium spp., Calonectria crotalariae on, stem and root rot disease, 831, **832**
corymbosum
blueberry stem canker and dieback caused by, 727, **728**
Calonectria crotalariae on, histopathology, 1228, **1229**
Monilinia vaccinii-corymbosi on
epidemiology of, 222
factors affecting apothecium development, 296, **299**
Vakili, N. G., (582)
Van Alfen, N. K., 1231, (1479)
Van Etten, H. D., (1433)
Van Zaayen, A., 1473
Vardaro, P. M., (582)
Vasiloff, G. N., 588
vegetables, nematodes on, yield losses vs. population density, 1072
Venturia inaequalis
ascospore tolerance to dodine, 649
electron microscopy of, 581
sporulation inhibited in, by fungicides, 587
Verticillium spp., on potato, yield affected by interaction with Alternaria and fungicides, 860
albo-atrum
assessment in field soils, 1043
on cotton
control by oil emulsions and benomyl and thiabendazole, 485
multiline cultivar potential for resistance to, 924, **925, 926**
on elms, clone response to, 702
inoculum density and propagule size affected by milling, 629
Meloidogyne and Trichodorus interaction with, on tomato, 1118

microsclerotia of, in soil, 563, 1159
on potato, interaction with nematodes, 579
dahliae
on chrysanthemum
anatomical observations, 578
factors affecting infection, 582
on cotton, gossypol and related terpenoids in roots of, 1297
in soil, cotton wilt related to, 22
malthousei
benomyl tolerance of, 331
germination affected by substrate and steam treatment, 581
nigrescens, on peppermint, pathogenicity and host range, 1267
Vessey, J. C., 769
Vicente, M., 159
Vicia
faba, Botrytis cinerea in epidermis of, mode of penetration, 461, **463**, **465**, **466**
villosa, Pseudomonas syringae on, survival and epidemiology, 1330, **1332**
Victoria, J. I., 753
victorin (see **toxin**)
Viennot-Bourgin, G., 912
Vigna
radiata, bean common mosaic virus of, natural infection, 1209, **1210**, **1213**
sinensis, root diseases of, interactions with herbicides and nematicides, 1353
unguiculata
Corynespora cassiicola on, host-specific isolates of, 1364
southern bean mosaic virus on, new strain in Ghana, 1100
Viljoen, N. M., (1400)
viruses (see also under specific virus names)
cytoplasmic inclusions and morphogenesis in healthy carrot cells, 588
epidemic and vector relations, symposium, 1050
in geranium, effect on rooting, 585
heat treatment for virus-free banana rhizomes, 320
immunoferritin procedures for tobacco etch virus, 418
meristem culture technique, for strawberry viruses, 1425, **1427**
mosquito-borne arboviruses, 1056, 1060
relation to culture of agallian leafhoppers, 1040
seed transmission and longevity, in alfalfa, 102
symbiosis of, barley to mosaic virus, 342
Vitanza, V. B., (277)
Vitis labrusca, peach rosette mosaic virus on, relation to grapevine degeneration in Michigan, 1174, **1176**, **1177**

Waggoner, P. E., 605, 1192
Walker, J. T., 1122
Wallin, J. R., 41, 899
Walsh, D. M., 588
Walton, G. S., (1231)
Wang, S. C., (107)
Ward, E. W. B., (1084)
Wargo, P. M., 588, 817
Warren, C. G., **1139**
watermelon mosaic virus
incidence in Florida, relation to spring aphid flights, 350
on Phaseolus vulgaris, inheritance of resistance to, 1448, **1449**
Waterreus, H. A. J. I., (1473)
Weathers, L. G., (196)
Weaver, D. J., 1429
Weaver, L. O., (373)
Webster, R. K., (178), (1499)
Weidensaul, T. C., (583), (588), 1018, 1024
Weinhold, A. R., 985
Welch, B. L., 1287, 1541
Wells, H. D., (476), 1379
Wells, J. M., 1012
Wells, O. O., 760
Westerlund, F. V., Jr., 432
wheat
Aspergillus spp. in stored seeds of, 1339, **1341**
Erysiphe graminis tritici on, secondary hyphae of, incompatible genotypes, 530
fungicides on, symptomless effects of, 812
Fusarium foot rot of, relation to water stress and cultural practices, 358
leaf spot complex on, losses from, fungicides for, 184
Puccinia graminis tritici on
comparison with races from triticale and rye, 266
computer-generated genotype for reaction to, 1380
root rot of, biological control ineffective for, 97
Septoria tritici on, epidemiology of, 1385
snow mold on, Typhula spp. genetics of, 123, ((572))
stem rust resistance in, inheritance in mildew differential, 1105
take-all of, organic amendments and N effects, 822
wheat spindle streak mosaic virus, on wheat, transmission and incubation temperature for, 554, ((1048))
wheat streak mosaic virus, Hordeum and ryegrass mosaic viruses related to, 128, **130**
Wheeler, H., 293, (905)
Whetzelinia sclerotiorum, on bean, ascospore inoculum in, 578
White, W. C., (876), (1518)
white pine, basal canker disease of, ecology in New York and Maine, 582
Whiteside, J. O., 115
Whitney, E. D., 380
Wiese, M. V., (1244)
Wiggins, E. A., (610)
Wilcoxson, R. D., (158)
Wilhelm, S., 924, 931
Wilson, E. M., 431
Wilson, H. J., 588
wilt
cell wall membrane affected by, phenol relations, 1214
on chickpea, Fusarium oxysporum, 432
winter fleck injury, western pine needle, histopathology of, 801, **804**, **805**
Witcher, W., (414)
witches' broom, on pigeon pea, 582
Woodbury, R., (582)
wood decay
electrical properties of, 578, 587
on maple and oak, measurement of electric current in, 1375
Wood, F. A., 897, (1018), (1024), (1483)
wood rots, in Eucalyptus sp., stilbene and polyphenol inhibition of, 939
Woods, T. L., 35
Wuest, P. J., 331, (581)

Xanthomonas
campestris
in soil, medium for isolation and enumeration, 876
survival in soil, 1518
carotae, on carrot, effect of temperature, light, and inoculation on disease, 746
corylina, on filbert, effect of stress on, 1537

eucalypti sp. n., die-back of Eucalyptus caused by, 143, **144**
manihotis, on cassava, etiology of, 74
oryzae
on rice
method for detection in seed, 273
suppression by Erwinia herbicola, 1182
pelargonii, on Pelargonium, control and epidemiology of, 1081
phaseoli, on pepper, H_2O_2 not involved in, 793
phaseoli sojensis, on soybean, activity affected by horseradish peroxidase, 542
pruni, phages of, temperature effects, 1248
vesicatoria
on pepper
H_2O_2 not involved in, 793
hypersensitivity altered by, 731
Xiphinema
cherry rasp leaf transmission by, 721
survival in soil, factors affecting, 507

Yariv, Z., 1111
Yanko, U., (1469)
Yarwood, C. E., 1044
Young, H. C., Jr., (262)

Zadoks, J. C., 918
Zaki, A. I., 490
Zauberman, G., 188
Zea mays (see **corn**)
Zeiders, K. E., 589
Zentmyer, G. A., (404), (500), 769
Zettler, F. W., (768)
Zeyen, R. J., (163)
Zimmer, D. E., 1465
Ziv, O., (1385)
Zoysia japonica, Meloidogyne spp. on, infection and disease control in, 1485, **1488**

Phytopathology

An International Journal

Official Organ of

THE AMERICAN PHYTOPATHOLOGICAL SOCIETY

VOLUME 64

JANUARY-DECEMBER 1974

Editor-in-Chief
A. R. WEINHOLD

Senior Editors
B. W. KENNEDY
T. KOSUGE
J. L. LOCKWOOD

Associate Editors

CONTENTS OF VOLUME 64, 1974

No. 1 – JANUARY

Author's Guide 1

Fellows of The American Phytopathological Society 4

Ruth Allen Award 9

John Jacob Natti, 1914-1971 ..... A. J. BRAUN, R. M. GILMER, and W. T. SCHROEDER 10

Wilbur Theodore Schroeder, 1911-1972 ..... R. M. GILMER, A. J. BRAUN, and M. SZKOLNIK 11

Howard P. Barss, 1885-1973 ..... R. H. BARSS 12

Bascombe Britt Higgins, 1887-1968 ..... E. S. LUTTRELL 13

Interaction of Fusarium spp. and certain plant parasitic nematodes on maize .. L. T. PALMER and D. H. MAC DONALD 14

Influence of relative humidity on production of aflatoxin in rice by Aspergillus parasiticus
R. A. BOLLER and H. W. SCHROEDER 17

Characteristics and concentration of propagules of Verticillium dahliae in air-dried field soils in relation to the prevalence of Verticillium wilt in cotton
J. E. DE VAY, L. L. FORRESTER, R. H. GARBER, and E. J. BUTTERFIELD 22

Ultrastructure of tobacco mesophyll protoplasts inoculated with cucumber mosaic virus
Y. HONDA, C. MATSUI, Y. OTSUKI, and I. TAKEBE 30

Inhibitory effects of a polyphenol-polyphenol oxidase system on the infectivity of cowpea chlorotic mottle virus ribonucleic acid ..... T. L. WOODS and G. N. AGRIOS 35

Epidemiology of Rhizoctonia solani pre-emergence damping-off of radish: influence of pentachloronitrobenzene ..... D. M. BENSON and R. BAKER 38

Air sampling to detect spores of Helminthosporium maydis race T ..... J. R. WALLIN and D. V. LOONAN 41

A strain of belladonna mottle virus isolated from Physalis heterophylla in Iowa ..... H. E. MOLINE and R. E. FRIES 44

Increased endomycorrhizae of cotton roots in soil treated with nematicides . G. W. BIRD, J. R. RICH, and S. U. GLOVER 48

Genetic studies on tolerance to carboxin and benomyl at the asexual phase of Ustilago hordei
Y. BEN-YEPHET, Y. HENIS, and A. DINOOR 51

Dissemination and survival of Colletotrichum trifolii under field conditions ..... F. L. LUKEZIC 57

Incidence and source of inoculum of peanut mottle virus and its effect on peanut ..... O. R. PAGUIO and C. W. KUHN 60

Barley stripe mosaic virus infection of corn and the "aberrant ratio" genetic effect ..... D. R. PRING 64

A self-inhibitor in uredospores of the coffee rust fungus .... M. R. MUSUMECI, W. B. C. MORAES, and R. C. STAPLES 71

Bacterial blight of cassava in Colombia: etiology ..... J. C. LOZANO and L. SEQUEIRA 74

Bacterial blight of cassava in Colombia: epidemiology and control ..... J. C. LOZANO and L. SEQUEIRA 83

Cellular basis of growth rate differences in isolates of Rhizoctonia solani: choice of isolates, properties, and content of DNA, RNA, protein, and ATP ..... F.-K. LIN and D. GOTTLIEB 88

Role of temperature, plant age, and fungus isolate in the development of brown stem rot in soybeans ..... L. E. GRAY 94

Root rot reaction in wheat: resistance not mediated by rhizosphere or laimosphere antagonists
T. G. ATKINSON, J. L. NEAL, JR., and R. I. LARSON 97

Alfalfa mosaic virus transmission to seed through alfalfa gametes and longevity in alfalfa seed ..... F. I. FROSHEISER 102

Conversion of phaseollin to phaseollinisoflavan by Stemphylium botryosum
V. J. HIGGINS, A. STOESSL, and M. C. HEATH 105

Basidiospore infection of cotton bolls by Thanatephorus cucumeris .. W. J. LUKE, J. A. PINCKARD, and S.-Y. C. WANG 107

Seed transmission and distribution of tobacco streak virus in six cultivars of soybeans
A. M. GHANEKAR and F. W. SCHWENK 112

Environmental factors affecting infection of citrus leaves by Mycosphaerella citri ..... J. O. WHITESIDE 115

Influence of Aspergillus candidus on production of aflatoxin in rice by Aspergillus parasiticus
R. A. BOLLER and H. W. SCHROEDER 121

Sexual incompatibility and aspects of the mono- and dikaryotic phases of Typhula idahoensis ..... B. M. CUNFER 123

Leaf-dip serology for the determination of strain relationships of elongated plant viruses ..... W. G. LANGENBERG 128

Injury and yield responses of soybean to chronic doses of ozone and sulfur dioxide in the field
A. S. HEAGLE, D. E. BODY, and G. E. NEELY 132

Purification of curly top virus ..... D. L. MUMFORD 136

Purification of curly top virus ..... G. I. MINK and P. E. THOMAS 140

PHYTOPATHOLOGICAL NOTES

Die-back of Eucalyptus citriodora caused by Xanthomonas eucalypti sp. n. ..... R. TRUMAN 143

A model for determining spatial distribution of soil-borne propagules ..... M. L. MC COY and R. L. POWELSON 145

Effects of pyracarbolid on coffee leaf rust in Kenya ..... S. K. MULINGE, C. J. BAKER, and J. L. PEREIRA 147

Hyphal anastomosis in Phytophthora capsici ..... L. W. STEPHENSON, D. C. ERWIN, and J. V. LEARY 149

"Motley dwarf" virus disease complex of California carrots ..... C. J. KRASS and D. E. SCHLEGEL 151

Stimulation of germination of Polyporus dryophilus basidiospores by carbon dioxide
H. L. MORTON and D. W. FRENCH 153

Colletotrichum truncatum borne within the seedcoat of soybean
R. W. SCHNEIDER, O. D. DHINGRA, J. F. NICHOLSON, and J. B. SINCLAIR 154

Effects of plant age upon development of necrosis and occurrence of intraxylem sclerotia in soybean infected with Macrophomina phaseolina ..... M. B. ILYAS and J. B. SINCLAIR 156

Inhibition of uredospore germination by light partially relieved by soaking spores in water
H.-S. CHANG, R. D. WILCOXSON, and L. CALPOUZOS 158

No. 2 – FEBRUARY

Karl Martin Silberschmidt, 1903-1973 ..... M. VICENTE 159

William Newton, 1893-1973 ..... R. NEWTON 160

Red clover clones with hypersensitive reaction to an isolate of bean yellow mosaic virus ..... S. DIACHUN and L. HENSON 161

Storage and behavior in soil of Septoria spp. isolated from cereals ..... B. L. SHEARER, R. J. ZEYEN, and J. J. OOKA 163

Influence of tillage, planting date, inoculum survival, and mixed populations on epidemiology of southern corn leaf blight ..... D. R. SUMNER and R. H. LITTRELL 168

Races, pathogenicity, and chemical control of Plasmodiophora brassicae in Ontario
A. A. REYES, T. R. DAVIDSON, and C. F. MARKS 173

Nitrogen fertilization and severity of stem rot of rice ..... R. KEIM and R. K. WEBSTER 178

Losses in wheat caused by Pyrenophora trichostoma and Leptosphaeria avenaria f. sp. triticea ..... R. M. HOSFORD, JR. and R. H. BUSCH 184

Changes in the ripening process of avocado fruit infected by Fusarium solani ..... G. ZAUBERMAN and M. SCHIFFMANN-NADEL 188

The influence of seedling exudates on the resistance of peas to Fusarium and Pythium root rot ..... J. M. KRAFT 190

Rapid screening for bacterial wilt resistance in alfalfa with a phytotoxic glycopeptide from Corynebacterium insidiosum ..... C. S. STRALEY, M. L. STRALEY, and G. A. STROBEL 194

Some effects of metabolic changes induced in Etrog citron by three isolates of exocortis virus ..... S. P. KAPUR, D. J. GUMPF, and L. G. WEATHERS 196

Dispersal of Phytophthora palmivora sporangia by wind-blown rain ..... J. E. HUNTER and R. K. KUNIMOTO 202

Age of pine seedlings with primary needles affects sensitivity to ozone and sulfur dioxide ..... C. R. BERRY 207

Etiology of sweet potato russet crack disease ..... R. N. CAMPBELL, D. H. HALL, and N. M. MIELINIS 210

Yields of six soybean cultivars following fumigation of soil infested with root knot nematodes ..... N. A. MINTON and M. B. PARKER 219

An epidemiological study of mummy berry disease of highbush blueberry ..... D. C. RAMSDELL, J. W. NELSON, and R. MYERS 222

Toxicity of endopolygalacturonate trans-eliminase, phosphatidase, and protease to potato and cucumber tissue ..... T. C. TSENG and M. S. MOUNT 229

Dasheen mosaic virus and other phytopathogens eliminated from caladium, taro, and cocoyam by culture of shoot tips ..... R. D. HARTMAN 237

Effects of mechanical injury, fungi, and soil temperature on peanut seed decay in soil ..... D. K. BELL 241

Leptosphaerulina briosiana on alfalfa: relation of lesion size to leaf age and light intensity ..... K. T. LEATH and R. R. HILL, JR. 243

Heterothallism in the apple powdery mildew fungus, Podosphaera leucotricha ..... D. L. COYIER 246

Fungal colonization of peanut fruit as related to southern corn rootworm injury ..... D. M. PORTER and J. C. SMITH 249

PHYTOPATHOLOGICAL NOTES

Pythium spp. associated with foliar blighting of creeping bentgrass ..... R. R. MUSE, A. F. SCHMITTHENNER, and R. E. PARTYKA 252

First introduction of a rust fungus in Australia for the biological control of skeleton weed ..... S. HASAN 253

Leaf spot of Ligustrum sinense caused by Corynespora cassiicola and its control ..... J. W. MILLER and S. A. ALFIERI, JR. 255

Ultrastructural changes in pollen exposed to ozone ..... B. H. HARRISON and W. A. FEDER 257

Status of cotton boll rot in the San Joaquin Valley of California following simulated pink bollworm injury ..... R. K. KIYOMOTO and L. J. ASHWORTH, JR. 259

A method for observing rickettsialike bacteria associated with phony peach disease ..... W. J. FRENCH 260

Improved methods for the axenic culture of Puccinia recondita f. sp. tritici ..... S. A. RAYMUNDO and H. C. YOUNG, JR. 262

Sclerotinia blight of peanuts ..... D. M. PORTER and M. K. BEUTE 263

Felling infected oaks in natural stands reduces dissemination of Polyporus hispidus spores ..... F. I. MC CRACKEN and E. R. TOOLE 265

Susceptibility of triticale, rye, and wheat to stem rust from these three hosts ..... A. LOPEZ, S. RAJARAM, and L. I. DE BAUER 266

A foliar disease of Anthurium seedlings caused by Aphelenchoides fragariae ..... J. E. HUNTER, W. H. KO, R. K. KUNIMOTO, and T. HIGAKI 267

Distribution pattern of bean common mosaic virus in developing bean seed ..... E. J. A. EKPO and A. W. SAETTLER 269

Interaction between root knot nematode and Pseudomonas marginata on gladiolus corms ..... M. A. EL-GOORANI, M. K. ABO-EL-DAHAB, and F. F. MEHIAR 271

An improved method for detecting the presence of Xanthomonas oryzae in rice seed ..... S. P. Y. HSIEH, I. W. BUDDENHAGEN, and H. E. KAUFFMAN 273

Isolation and identification of Pyrenochaeta terrestris from soil on dilution plates ..... B. SNEH, D. NETZER, and J. KRIKUN 275

Errata 276

No. 3 – MARCH

Synergy between Achromobacter sp. and Pseudomonas phaseolicola resulting in increased disease
A. L. MAINO, M. N. SCHROTH, and V. B. VITANZA 277

Influence of temperature on production of aflatoxin in rice by Aspergillus parasiticus
R. A. BOLLER and H. W. SCHROEDER 283

Deoxyribonucleic acid in dahlia mosaic virus ..... I. FUJISAWA, M. RUBIO-HUERTOS, and C. MATSUI 287

The occurrence and cause of cavitation of American elm shoot nodal tissue infected by Ceratocystis ulmi
W. E. MAC HARDY and C. H. BECKMAN 290

Pathogenicity, host range, and distribution of Colletotrichum graminicola on corn
H. WHEELER, D. J. POLITIS, and C. G. PONELEIT 293

Factors affecting apothecium development of Monilinia vaccinii-corymbosi from mummied highbush blueberry fruit
R. D. MILHOLLAND 296

Factors affecting control of European apple canker by Difolatan and basic copper sulfate
H. J. DUBIN and H. ENGLISH 300

Remission of symptoms following tetracycline treatment of lethal yellowing-infected coconut palms
P. HUNT, A. J. DABEK, and M. SCHUILING 307

Physical and serological properties of maize dwarf mosaic and sugarcane mosaic viruses ... M. TOSIC and R. E. FORD 312

Effect of constant moisture levels on Pythium rot of peanut pods ..... Z. R. FRANK 317

Heat treatment and meristem culture for the production of virus-free bananas .... L. A. BERG and M. BUSTAMANTE 320

Population levels of Aspergillus flavus and the A. niger group in Virginia peanut field soils
G. J. GRIFFIN and K. H. GARREN 322

Noninterference of Pseudomonas in the bright, greenish-yellow (BGY) fiber-fluorescence test for Aspergillus flavus boll rot
P. B. MARSH, M. E. SIMPSON, and G. V. MEROLA 326

Soybean bacterial blight: flower inoculation studies ..... P. H. KAUFFMAN and C. LEBEN 329

Tolerance of Verticillium malthousei to benomyl ..... P. J. WUEST, H. COLE, JR., and P. L. SANDERS 331

Fungitoxic action of a copper-chromium-arsenate wood preservative ... C. K. CHOU, R. D. PRESTON and M. P. LEVI 335

The range of symbiosis of barley and barley stripe mosaic virus ..... R. G. TIMIAN 342

Antibiotic sensitivity in vitro of the mycoplasmalike organism associated with citrus stubborn disease
J. W. BOWYER and E. C. CALAVAN 346

Spring aphid flights and incidence of watermelon mosaic viruses 1 and 2 in Florida ..... W. C. ADLERZ 350

Fusarium blight symptoms on seedling and mature Merion Kentucky bluegrass plants inoculated with Fusarium roseum and Fusarium tricinctum ..... D. E. FULTON, H. COLE, JR., and P. E. NELSON 354

Plant water stress and development of Fusarium foot rot in wheat subjected to different cultural practices
R. I. PAPENDICK and R. J. COOK 358

Light- and scanning electron microscopy of cucumber and barley powdery mildew on host and nonhost plants
T. STAUB, H. DAHMEN, and F. J. SCHWINN 364

Infection of aboveground parts of bean by Pythium aphanidermatum
S. H. KIM, J. G. KANTZES, and L. O. WEAVER 373

Synergistic effect of Pythium ultimum and the additive effect of P. aphanidermatum with Heterodera schachtii on sugarbeet ..... E. D. WHITNEY 380

Reduction of ozone-sensitivity of pinto bean by bean common mosaic virus
D. D. DAVIS and S. H. SMITH 383

Development and evaluation of a computerized forecasting method for Cercospora leafspot of peanuts
D. W. PARVIN, JR., D. H. SMITH, and F. L. CROSBY 385

A necrotic strain of citrus ringspot virus and its relationship to citrus psorosis virus ..... L. W. TIMMER 389

Lectin-detectable differences in carbohydrate-containing surface moieties of macroconidia of Fusarium roseum 'Avenaceum' and Fusarium solani ..... S. J. KLEINSCHUSTER and R. BAKER 394

Susceptibility of southern oaks to Cronartium fusiforme and Cronartium quercuum ..... L. D. DWINELL 400

Ribosome content of various spore forms of Phytophthora spp. J. V. LEARY, J. R. ROHEIM, and G. A. ZENTMYER 404

Yield loss by Brassica campestris and B. napus from systemic stem infection by Albugo cruciferarum
F. R. HARPER and U. J. PITTMAN 408

Conidial stage of Hypoxylon pruinatum: factors influencing pillar production and conidial germination
D. K. BAGGA, E. B. SMALLEY, and J. G. BERBEE 411

Histochemical studies of yellow poplar infected with Fusarium solani ..... J. D. ARNETT and W. WITCHER 414

A study of tobacco etch virus-induced inclusions using indirect immunoferritin procedures
J. F. SHEPARD, G. GAARD, and D. E. PURCIFULL 418

Effect of motility of Phytophthora palmivora zoospores on disease severity in papaya seedlings and substrate colonization in soil ..... J. T. KLIEJUNAS and W. H. KO 426

PHYTOPATHOLOGICAL NOTES

Punch inoculation for measuring resistance of corn leaf tissue to Helminthosporium maydis
M. MATSUYAMA and S. RICH 429

No. 4 – APRIL

Thomas Traquair McClure, 1914—1973 ..... E. M. WILSON and F. HAYASHI 431

Fungal root rots and wilt of chickpea in California ..... F. V. WESTERLUND, R. N. CAMPBELL, and K. A. KIMBLE 432

Host-specific forms of Trichometasphaeria turcica in relation to homokaryons and heterokaryons in nature ..... O. R. MASIAS and R. R. BERGQUIST 436

Comparison of techniques for purification of maize dwarf- and sugarcane mosaic viruses ..... M. TOSIC, R. E. FORD, H. E. MOLINE, and D. E. MAYHEW 439

Cercospora leaf mold of tomato ..... C. H. BLAZQUEZ and S. A. ALFIERI, JR. 443

Localization of viral RNA polymerase activity and its products in extracts of barley leaves infected with bromegrass mosaic virus ..... J. SEMAL, J. KUMMERT, and D. DEKEGEL 446

Geographical localization and lint fluorescence in relation to aflatoxin production in Aspergillus flavus-infected cottonseed
D. E. GARDNER, J. L. MC MEANS, C. M. BROWN, R. M. BILBREY, and L. L. PARKER 452

Factors affecting penetrance of resistance to Fusarium oxysporum f. sp. lycopersici in tomatoes
H. ALON, J. KATAN, and N. KEDAR 455

Mode of penetration of epidermal cell walls of Vicia faba by Botrytis cinerea ..... W. E. MC KEEN 461

Evaluation of selective media for isolation of soft-rot bacteria from soil and plant tissue ..... D. CUPPELS and A. KELMAN 468

Bipolaris leaf blight of Panicum fasciculatum: effects of host age and photoperiod on susceptibility
E. S. LUTTRELL, H. B. HARRIS, and H. D. WELLS 476

The role of abscised Cylindrocladium-infected azalea leaves in the epidemiology of Cylindrocladium wilt of azalea ..... R. G. LINDERMAN 481

Effect of oil emulsions on the uptake of benomyl and thiabendazole in relation to control of Verticillium wilt of cotton ..... D. C. ERWIN, R. A. KHAN, and H. BUCHENAUER 485

Influence of oils on the uptake and translocation of methyl 2-benzimidazolecarbamate in cotton
A. I. ZAKI, D. C. ERWIN, and S. TSAI 490

Tobacco and tomato ringspot viruses and their relationships with Tetranychus urticae
C. R. GRANILLO and S. H. SMITH 494

Electrotactic response of zoospores of seven species of Phytophthora ..... K. L. KHEW and G. A. ZENTMYER 500

Time, temperature, and soil moisture effects on Xiphinema bakeri: nematode survival in fallow soil ..... J. R. SUTHERLAND and L. J. SLUGGETT 507

Studies on heterokaryosis and virulence of Rhizoctonia solani ..... H. A. BOLKAN and E. E. BUTLER 513

Histology of leaf infection of susceptible and resistant soybeans by Peronospora manshurica
J. H. RIGGLE and J. M. DUNLEAVY 522

Influence of soil bulk density and water potential on Fusarium root rot of beans ..... D. E. MILLER and D. W. BURKE 526

Elongation of secondary hyphae of Erysiphe graminis f. sp. tritici on wheat with compatible and incompatible parasite/host genotypes ..... R. E. STUCKEY and A. H. ELLINGBOE 530

Electron microscopy of cucumber mosaic virus-infected tobacco leaves showing mosaic symptoms
Y. HONDA and C. MATSUI 534

Benomyl residues in Valencia oranges from postharvest application containing emulsified oil ..... G. E. BROWN 539

Bactericidal activity of horseradish peroxidase on Xanthomonas phaseoli var. sojensis
N. V. RAMA RAJE URS and J. M. DUNLEAVY 542

Responses of beans and peas to root pathogens accumulated during monoculture of each crop species ..... D. W. BURKE and J. M. KRAFT 546

Relationship between population densities of Heterodera schachtii and losses in vegetable crops in Ontario ..... T. H. A. OLTHOF, J. W. POTTER, and E. A. PETERSON 549

Differentiation of transmission and incubation temperatures for wheat spindle streak mosaic virus ..... J. T. SLYKHUIS 554

Germination of Fusarium solani f. sp. pisi chlamydospores in the spermosphere of pea ..... G. E. SHORT and M. L. LACY 558

Free and bound microsclerotia of Verticillium albo-atrum in soils
L. J. ASHWORTH, JR., O. C. HUISMAN, D. M. HARPER, and L. K. STROMBERG 563

PHYTOPATHOLOGICAL NOTES

An improved method for screening cucumbers for scab resistance ..... D. A. EMMATTY 565

Ascospore discharge from perithecia of Calonectria theae, C. crotalariae, and C. kyotensis ..... R. G. LINDERMAN 567

Relationships among isolates of pea seed-borne mosaic virus from the United States and Japan ..... G. I. MINK, T. INOUYE, R. O. HAMPTON, and J. E. KNESEK 569

A quantitative technique for the extraction of soil-inhabiting mites (Acarina) and springtails (Collembola) associated with pod rot disease of peanut ..... M. K. BEUTE 571

Errata 572

No. 5 – MAY

Thomas Ellsworth Rawlins, 1895-1972 ..... W. N. TAKAHASHI and M. W. GARDNER 573

Samuel George Lehman, 1887-1973 ..... R. AYCOCK and A. KELMAN 574

Donald Folsom, 1891-1973 ..... M. T. HILBORN and G. A. MC INTYRE 575

Letter to the Editor ..... R. HALL 576

Abstracts of the Thirty-Third Annual Meeting of the Northeastern Division of The American Phytopathological Society ... 578

An ultraviolet-induced nontoxigenic mutant of Pseudomonas phaseolicola of altered pathogencity
S. S. PATIL, A. C. HAYWARD, and R. EMMONS 590

Alteration of germination patterns of sclerotia of Macrophomina phaseolina on soil surfaces
D. K. G. AYANRU and R. J. GREEN, JR. 595

Formosan sweetgum susceptible to North American Endothia gyrosa
G. A. SNOW, J. W. BELAND, and F. J. CZABATOR 602

Mathematical model for spore germination at changing temperature ..... P. E. WAGGONER and J. -Y. PARLANGE 605

Determination of sclerotial populations of Sclerotium rolfsii in soil by a rapid flotation-sieving technique
R. R. RODRIGUEZ-KABANA, P. A. BACKMAN, and E. A. WIGGINS 610

Infrared fluorescence of corn leaves infected by Helminthosporium maydis
G. H. SUITS, G. R. SAFIR, R. R. LEGAULT, and A. H. ELLINGBOE 615

Southern corn leaf blight development relative to temperature, moisture, and fungicide applications
N. C. SCHENCK and T. J. STELTER 619

Abiotic generation of a volatile fungistatic factor in soil by liming ..... T. S. HORA and R. BAKER 624

The influence of milling of air-dry soil upon apparent inoculum density and propagule size of Verticillium albo-atrum
L. J. ASHWORTH, JR., D. M. HARPER, and H. L. ANDRIS 629

Inheritance of resistance to tomato yellow leaf curl virus in tomatoes ..... M. PILOWSKY and S. COHEN 632

Effect of temperature and moisture on Cristulariella pyramidalis ..... A. J. LATHAM 635

Distribution of maize dwarf mosaic and aphid vectors in Ohio
J. K. KNOKE, R. LOUIE, R. J. ANDERSON, and D. T. GORDON 639

Physiologic specialization in Trichometasphaeria turcica f. sp. zeae and T. turcica f. sp. sorghi in Hawaii
R. R. BERGQUIST and O. R. MASIAS 645

Ascospore tolerance to dodine in relation to orchard control of apple scab .... J. D. GILPATRICK and D. R. BLOWERS 649

An assay for Helminthosporium victoriae toxin based on induced leakage of electrolytes from oat tissue
K. E. DAMANN, JR., J. M. GARDNER, and R. P. SCHEFFER 652

The development of Hypoxylon canker of Populus tremuloides: role of ascospores, conidia, and toxins
D. K. BAGGA and E. B. SMALLEY 654

The development of Hypoxylon canker of Populus tremuloides: role of interacting environmental factors
D. K. BAGGA and E. B. SMALLEY 658

Variation of Hypoxylon pruinatum in cultural morphology and virulence ..... D. K. BAGGA and E. B. SMALLEY 663

Mycoplasmalike organisms associated with lethal yellowing disease of palms ..... M. V. PARTHASARATHY 667

Dutch elm disease in clones from white elms resistant and susceptible to Ceratocystis ulmi
W. A. SINCLAIR and W. D. BRENER 675

The effect of environment on the response of bean cultivars to infection by strains of bean common mosaic virus
R. ALCONERO and J. P. MEINERS 679

The role of twig infections on the incidence of perennial canker of peach ..... A. TEKAUZ and Z. A. PATRICK 683

Juvenile susceptibility of ponderosa pine to dwarf mistletoe ..... L. F. ROTH 689

Ecology and control of seedling diseases of crucifers ..... D. R. SUMNER 692

Antigenic relationship of Meloidogyne incognita, M. javanica, and M. arenaria ..... I. MISAGHI and M. A. MC CLURE 698

Response of elm species and clones to inoculation with Verticillium albo-atrum
K. J. RAUSCHER, D. T. LESTER, and E. B. SMALLEY 702

A selective medium for the enumeration and isolation of Phoma betae from soil and seed ..... W. M. BUGBEE 706

Relative abilities of Phialophora melinii, Fomes connatus, and F. ligniarius to invade freshly wounded tissues of Acer rubrum
A. L. SHIGO 708

Epidemiological patterns of Phytophthora infestans under semi-arid conditions .....J. ROTEM and Y. COHEN 711

Hemolysins in potato plants and their relation to virus infection .....K. LIU and J. S. BOYLE 714

Host and nonhost effects on soil populations of Phytophthora parasitica var. nicotianae
R. A. FLOWERS and J. W. HENDRIX 718

Origin, cause, host range, and spread of cherry rasp leaf disease in North America
A. J. HANSEN, G. NYLAND, F. D. MC ELROY, and R. STACE-SMITH 721

Blueberry stem canker and dieback caused by Gloeosporium minus..... R. D. MILHOLLAND 727

Decreased hypersensitivity to xanthomonads in pepper after inoculations with virulent cells of Xanthomonas vesicatoria
R. E. STALL, J. A. BARTZ, and A. A. COOK 731

Response of mitochondria from corn cytoplasms to the pathotoxin of Helminthosporium maydis race T
W. A. KRUEGER, L. M. JOSEPHSON, and J. W. HILTY 735

Brown-pigment formation in tobacco leaves infected with Alternaria..... H. W. SPURR, JR., and C. E. MAIN 738

Bacterial blight of carrots: interaction of temperature, light, and inoculation procedures on disease development of various carrot cultivars .....F. L. PFLEGER, G. E. HARMAN, and G. A. MARX 746

PHYTOPATHOLOGICAL NOTES

Additional evidence for possible autolytic activity during glutaraldehyde fixation of maize dwarf mosaic virus-infected corn
W. G. LANGENBERG and H. F. SCHROEDER 750

Zearalenone in freshly harvested corn..... R. W. CALDWELL and J. TUITE 752

Light intensity effects on lesion size caused by Phytophthora infestans on potato leaves
J. I. VICTORIA and H. D. THURSTON 753

Association of mycoplasmalike bodies with little peach and x-disease
A. L. JONES, G. R. HOOPER, and D. A. ROSENBERGER 755

Eradication of Helminthosporium maydis inside popcorn seed ..... D. W. PRITCHARD 757

Dominant resistance to rust in red clover.....S. DIACHUN and L. HENSON 758

Correlation between artificial and natural inoculation of loblolly pine with southern fusiform rust
O. O. WELLS and R. J. DINUS 760

Effects of fertilization, site, and vertical position on the susceptibility of loblolly pine seedlings to fusiform rust
R. L. BLAIR and E. B. COWLING 761

Light inhibition of thallus growth of Armillaria mellea.....J. E. DOTY and P. C. CHEO 763

No. 6 – JUNE

Rush Porter Marshall, 1891-1973 ..... J. R. HANSBROUGH 765

Frank Dunn Kern, 1883-1973.....J. S. BOYLE, C. L. FERGUS, and R. D. SCHEIN 766

Abstracts of the 1973 Annual Meeting of the Caribbean Division of The American Phytopathological Society..... 767

Inhibition of photosynthesis diminishes antibacterial action of pepper plants
M. SASSER, A. K. ANDREWS, and Z. U. DOGANAY 770

The growth of two forest tree species adjacent to a periodic source of air pollution.....L. L. STONE and J. M. SKELLY 773

Ascochyta chrysanthemi toxin: production and properties ..... D. L. SCHADLER and D. F. BATEMAN 779

The ultrastructure of local lesions induced by potato virus X: a sequence of cytological events in the course of infection ..... A. V. ALLISON and T. A. SHALLA 784

Evidence against the involvement of hydrogen peroxide in bacterial leaf spot of pepper ..... M. SASSER 793

Preharvest inoculation and infection of dent corn ears with Aspergillus flavus and A. parasiticus G. W. RAMBO, J. TUITE, and P. CRANE 797

Histopathology of oxidant injury and winter fleck injury on needles of western pines .... P. R. MILLER and L. S. EVANS 801

Factors affecting bioassay of potato virus M in red kidney bean ..... C. HIRUKI, E. POUNTNEY, and K. N. SAKSENA 807

Symptomless effects of experimental fungicides on wheat ..... D. PRUSKY, A. DINOOR, and Y. ESHEL 812

Ozone injury to tobacco in the field influenced by soil treatments with benomyl and carboxin. G. S. TAYLOR and S. RICH 814

Infection of defoliated sugar maple trees by Armillaria mellea ..... P. M. WARGO and D. R. HOUSTON 817

Take-all of wheat as influenced by organic amendments and nitrogen fertilizers ..... R. W. SMILEY 822

Temperature effects on curly top resistance in Phaseolus vulgaris ..... M. J. SILBERNAGEL and A. M. JAFRI 825

Effect of temperature on lesion enlargement and sporulation of Pyricularia oryzae in rice leaves H. KATO and T. KOZAKA 828

Stem and root rot of blueberry caused by Calonectria crotolariae ..... R. D. MILHOLLAND 831

Ultrastructure at the host-parasite interface of Phytophthora megasperma var. sojae in soybean rootlets ..... R. L. SLUSHER, D. L. HAAS, Z. B. CAROTHERS, and J. B. SINCLAIR 834

Transmission of a bacilliform virus of sowthistle and Bidens pilosa S. R. CHRISTIE, R. G. CHRISTIE, and J. R. EDWARDSON 840

Factors affecting charcoal rot of soybean seedlings ..... W. A. MEYER, J. B. SINCLAIR, and M. N. KHARE 845

Races of Fusarium oxysporum f. sp. pisi, causal agents of wilt of pea ..... G. M. ARMSTRONG and J. K. ARMSTRONG 849

Microbial activity in benomyl-treated soils ..... J. L. PEEPLES 857

Interactions between foliar sprays and soil fumigation in the yield response of potatoes ..... M. D. HARRISON 860

Isolation, pathogenicity, and characterization of fluorescent pseudomonads associated with discolored alfalfa roots ..... P. A. SHINDE and F. L. LUKEZIC 865

Characterization and serological comparisons of bacteria of the genus Erwinia associated with discolored alfalfa roots ..... P. A. SHINDE and F. L. LUKEZIC 871

A selective medium for soil isolation and enumeration of Xanthomonas campestris .... N. W. SCHAAD and W. C. WHITE 876

Degradation of xylan by bacterial plant pathogens ..... A. L. MAINO, M. N. SCHROTH, and N. J. PALLERONI 881

The quantitative relation between plant and bacterial cells involved in the hypersensitive reaction J. G. TURNER and A. NOVACKY 885

Deficiency of inorganic nutrients as a contributing factor to ohia decline ..... J. T. KLIEJUNAS and W. H. KO 891

PHYTOPATHOLOGICAL NOTES

Response of eight cultivars of chrysanthemum to peroxyacetyl nitrate ..... F. A. WOOD and D. B. DRUMMOND 897

A rapid method of identifying Helminthosporium maydis race T from spore samplers J. R. WALLIN and D. V. LOONAN 899

Cytospora-induced changes in stems of Prunus persica ..... T. J. BANKO and A. W. HELTON 899

Reversal of self-inhibition by peroxidase and hydrogen peroxide in wheat stem rust uredospores: mode of action V. MACKO and J. A. A. RENWICK 901

Use of the Sykes-Moore tissue-culture chamber and the Cambion heating-cooling stage for spore germination research
C. F. HODGES 903

Effect of the pathotoxin victorin on the pattern of glucose catabolism in susceptible oats
C. D. RAWN and H. WHEELER 905

No. 7 – JULY

Harry Warren Anderson, 1885-1971 ..... H. H. THORNBERRY 907

Keynote Addresses Presented at the Second International Congress of Plant Pathology, Minneapolis, Minnesota, September 1973 908

Introduction: Why are we here? ..... E. C. STAKMAN 908

Impact of agricultural development on population growth and economic progress ..... J. H. JENSEN 909

The role of phytopathological research in developing countries ..... G. VIENNOT-BOURGIN 912

The role of epidemiology in modern phytopathology ..... J. C. ZADOKS 918

Resistance to Verticillium wilt in cotton: sources, techniques of identification, inheritance trends, and the resistance potential of multiline cultivars ..... S. WILHELM, J. E. SAGEN, and H. TIETZ 924

Gossypium hirsutum subsp. mexicanum var. nervosum, Leningrad strain—a source of resistance to Verticillium wilt ..... S. WILHELM, J. E. SAGEN, and H. TIETZ 931

Inhibition of wood-rotting fungi by stilbenes and other polyphenols in Eucalyptus sideroxylon
J. H. HART and W. E. HILLIS 939

Effect of acetaldehyde vapor on postharvest decay and market quality of fresh strawberries
K. PRASAD and G. J. STADELBACHER 948

Kinetics of multiplication, inactivation, and particle-breakdown of cowpea chlorotic mottle virus in cowpea
W. O. DAWSON and C. W. KUHN 951

Epidemiology of Rhizoctonia solani preemergence damping-off of radish: inoculum potential and disease potential interaction ..... D. M. BENSON and R. BAKER 957

Distribution of benzimidazole fungicides following pressure injection of pear trees at several growth stages ..... E. SHABI, Y. PINKAS, and Z. SOLEL 963

Postharvest temperature effects on wound healing and surface rot in sweetpotato ... L. W. NIELSEN and J. T. JOHNSON 967

Histopathology of resistant and susceptible soybean hypocotyls inoculated with Phytophthora megasperma var. sojae ..... W. L. KLARMAN and M. K. CORBETT 971

Cortical monoterpene and fusiform rust resistance relationships in slash pine ..... D. L. ROCKWOOD 976

Carnation yellow fleck virus ..... M. SMOOKLER and G. LOEBENSTEIN 979

Repression of virulence in Rhizoctonia solani by glucose and 3-*O*-methyl glucose ... A. R. WEINHOLD and T. BOWMAN 985

Identification of the self-inhibitor and some germination characteristics of peanut rust uredospores ..... A. S. FOUDIN and V. MACKO 990

Association of virus-induced changes in laimosphere microflora and hypocotyl exudation with protection to Fusarium stem rot ..... A. C. MAGYAROSY and J. G. HANCOCK 994

Sphaeropsis gall of bottlebrush tree, Callistemon viminalis, a new host ..... R. B. MARLATT and W. H. RIDINGS 1001

The influence of inoculation procedure on the host range of pea seed-borne mosaic virus
A. A. AAPOLA, J. E. KNESEK, and G. I. MINK 1003

Dosage response of Phytophthora cinnamomi to methyl bromide
D. E. MUNNECKE, J. L. BRICKER, and M. J. KOLBEZEN 1007

Nuclear orientation in onion epidermal cells in relation to wounding and infection
A. J. PAPPELIS, G. A. PAPPELIS, and F. B. KULFINSKI 1010

Growth of Erwinia carotovora, E. atroseptica, and Pseudomonas fluorescens in low oxygen and high carbon dioxide atmospheres ..... J. M. WELLS 1012

Manganese effect on the local lesion symptom of potato spindle tuber 'virus' in Scopolia sinensis
R. P. SINGH, C. R. LEE, and M. C. CLARK 1015

Response of Fusarium solani to constant and fluctuating temperatures and its relationship to Fusarium canker of sugar maple ..... T. C. WEIDENSAUL and F. A. WOOD 1018

Analysis of a maple canker epidemic in Pennsylvania ..... T. C. WEIDENSAUL and F. A. WOOD 1024

Axenic culture of the mononucleate stage of Cronartium ribicola ..... A. E. HARVEY and J. L. GRASHAM 1028

Adaptation of four pathogens to semi-arid habitats as conditioned by penetration rate and germinating spore survival ..... E. BASHI and J. ROTEM 1035

PHYTOPATHOLOGICAL NOTES

New medium and conditions for the culture of monolayers of agallian leafhopper cells used in studies of certain plant viruses ..... G. MARTINEZ-LOPEZ and L. M. BLACK 1040

Factors affecting the activity of a volatile fungistatic substance in certain alkaline soils ..... W. H. KO and F. K. HORA 1042

Quantitative assessment of Verticillium albo-atrum in field soils: procedural and substrate improvements ..... O. C. HUISMAN and L. J. ASHWORTH, JR. 1043

Cold therapy of bean rust ..... C. E. YARWOOD 1044

Bacterial blight of Saintpaulia ionantha caused by Erwinia chrysanthemi ..... J. F. KNAUSS and J. W. MILLER 1046

Ozone injury on tobacco seedlings can predict susceptibility in the field ..... G. S. TAYLOR 1047

Erratum 1048

No. 8 — AUGUST

John Gilmer Atkins, Jr., 1916-1973 ..... F. M. LATTERELL and W. J. MARTIN 1049

Symposium on vector relationships and the development of epidemics 1050
Vector relationships and the development of epidemics: the epidemiology of plant viruses ..... J. M. THRESH 1050
Mosquito-borne arboviruses ..... R. M. KOKERNOT and B. DE MEILLON 1056
Vector population dynamics in relation to tick-borne arboviruses: a review ..... D. E. SONENSHINE 1060

Yield losses in fall-maturing vegetables relative to population densities of Pratylenchus penetrans and Meloidogyne hapla ..... J. W. POTTER and T. H. A. OLTHOF 1072

Purification and properties of pea seed-borne mosaic virus ..... J. E. KNESEK, G. I. MINK, and R. O. HAMPTON 1076

Epidemiology and control of bacterial leaf spot and stem rot of Pelargonium hortorum ..... D. E. DOUGHERTY, C. C. POWELL, and P. O. LARSEN 1081

Ultrastructural changes in pepper cells in a compatible interaction with Phytophthora capsici ..... D. R. JONES, W. G. GRAHAM, and E. W. B. WARD 1084

Fungicide movement in soils ..... C. S. HELLING, D. G. DENNISON, and D. D. KAUFMAN 1091

A new cowpea strain of southern bean mosaic virus from Ghana ..... P. N. L. LAMPTEY and R. I. HAMILTON 1100

Inheritance of stem rust resistance in Triticum aestivum, 'C. I. 14115', a powdery mildew differential ..... F. J. GOUGH and O. G. MERKLE 1105

Cercospora omphakodes infection and disease development in Phlox divaricata
R. W. JUDD, JR. and J. L. PETERSON 1108

Ribosomal activity in uredospores germinated on membranes ..... Z. YANIV and R. C. STAPLES 1111

Isolation and properties of potato virus Y ribonucleic acid ..... K. M. MAKKOUK and D. J. GUMPF 1115

Interactions of the root-knot nematode Meloidogyne incognita and the stubby root nematode Trichodorus christiei with Verticillium albo-atrum on tomato at controlled inoculum densities ..... J. J. CONROY and R. J. GREEN, JR. 1118

Response of indicator plants to ozone levels in Georgia ..... J. T. WALKER and J. C. BARLOW 1122

Interactions between Alternaria porri and the saprophytic mycoflora of onion leaves N. J. FOKKEMA and J. W. LORBEER 1128

Properties of tobacco vein-mottling virus, a new pathogen of tobacco M. K. C. SUN, G. V. GOODING, JR., T. P. PIRONE, and S. A. TOLIN 1133

Liberation of Helminthosporium maydis spores by wind in the field ..... D. E. AYLOR and R. J. LUKENS 1136

Sclerotinia homeocarpa tolerance to benzimidazole configuration fungicides C. G. WARREN, P. SANDERS, and H. COLE 1139

Deleterious effects of tobacco smoke on germination and infectivity of spores of Puccinia graminis tritici and on germination of spores of Puccinia striiformis, Pyricularia oryzae, and an Alternaria species ..... J. S. MELCHING, J. R. STANTON, and D. L. KOOGLE 1143

PHYTOPATHOLOGICAL NOTES

Cankers and decay in red oaks caused by Fomes robustus ..... D. W. FRENCH and F. W. PERPICH 1148

Inheritance of virulence in Helminthosporium turcicum to monogenic resistant corn ..... S. M. LIM, J. G. KINSEY, and A. L. HOOKER 1150

Interaction of pH and temperature with exogenous carbon and nitrogen nutrition in conidial germination by Aspergillus flavus ..... T. PASS and G. J. GRIFFIN 1151

Importance of treatment timing in the control of Fusarium root rot of Douglas-fir seedlings ..... W. J. BLOOMBERG and W. LOCK 1153

Mycoplasmalike bodies associated with peach and periwinkle exhibiting symptoms of peach yellows ..... A. L. JONES, G. R. HOOPER, D. A. ROSENBERGER, and J. CHEVALIER 1154

Purification of mycoplasmalike organisms from china aster plants affected with clover phyllody ..... R. C. SINHA 1156

Prolonged storage of Helminthosporium victoriae in soil ..... J. P. JONES 1158

No. 9 – SEPTEMBER

Verticillium albo-atrum: quantitative isolation of microsclerotia from field soils O. C. HUISMAN and L. J. ASHWORTH, JR. 1159

Epidemiology of Rhizoctonia solani preemergence damping-off of radish: survival ..... D. M. BENSON and R. BAKER 1163

Interactions of Pseudomonas marginalis var. alfalfae, Erwinia amylovora var. alfalfae, and an unidentified bacterium (WB-e) with certain root pathogens of alfalfa ..... P. A. SHINDE and F. L. LUKEZIC 1169

Peach rosette mosaic virus, symptomatology and nematodes associated with grapevine 'degeneration' in Michigan D. C. RAMSDELL and R. L. MYERS 1174

Effects of Prunus ringspot virus on growth and productivity of Richards early Italian prune trees ..... A. W. HELTON 1179

Suppressing effects of Erwinia herbicola on infection by Xanthomonas oryzae and on symptom development in rice S. P. Y. HSIEH and I. W. BUDDENHAGEN 1182

Effect of the herbicide diphenamid on damping-off disease of pepper and tomato ..... J. KATAN and Y. ESHEL 1186

Verification of a model of spore germination at variable, moderate temperatures P. E. WAGGONER and J.-Y. PARLANGE 1192

Maize dwarf mosaic virus increases susceptibility of sorghum and corn to Helminthosporium maydis race T
S. P. S. BENIWAL and R. R. GUDAUSKAS 1197

Factors affecting apple leaf scar infection by Nectria galligena conidia ..... H. J. DUBIN and H. ENGLISH 1201

Etiology of tomato fruit rots and evaluation of cultural and chemical treatments for their control
C. W. JONES and S. M. MC CARTER 1204

Natural infection of mungbean by bean common mosaic virus ..... W. J. KAISER and G. H. MOSSAHEBI 1209

The stabilization of artificial and natural cell wall membranes by phenolic infusion and its relation to wilt disease resistance
C. H. BECKMAN, W. C. MUELLER, and M. E. MACE 1214

Cellular basis of growth rate differences in isolates of Rhizoctonia solani: metabolic processes and growth rates
F. K. LIN and D. GOTTLIEB 1220

Histopathology of Calonectria crotalariae on highbush blueberry ..... R. D. MILHOLLAND 1228

Pressure injection of benomyl and methyl-2-benzimidazolecarbamate hydrochloride for control of Dutch elm disease
N. K. VAN ALFEN and G. S. WALTON 1231

The origin, development, and conformation of amorphous inclusion body components in tobacco etch virus-infected cells
J. H. ANDREWS and T. A. SHALLA 1234

Effects of pregermination environments on the germinability of uredospores of two wheat rust fungi
P. N. SOOD and M. W. WIESE 1244

Temperature effects on the relationships between Xanthomonas pruni and its virulent phages ..... E. L. CIVEROLO 1248

Effect of moisture on conidiophore morphology of Cristulariella pyramidalis ..... A. J. LATHAM 1255

Survival of Phoma betae in soil ..... W. M. BUGBEE and O. C. SOINE 1258

Infection of ectomycorrhizal and nonmycorrhizal roots of shortleaf pine by nematodes and Phytophthora cinnamomi
R. O. BARHAM, D. H. MARX, and J. H. RUEHLE 1260

PHYTOPATHOLOGICAL NOTES

Extraction of fluid from healthy and Dutch-elm-diseased elm branches using hydraulic compression
A. C. WOODS and F. W. HOLMES 1265

Verticillium nigrescens from peppermint ..... H. A. MELOUK and C. E. HORNER 1267

No. 10 – OCTOBER

Mycoplasmalike organism associated with pecan bunch disease
C. E. SELISKAR, G. E. KEN KNIGHT, and C. E. BOURNE 1269

Absorption and metabolism of 3-hydroxy-5-methylisoxazole in plants and the biological activities of its metabolites
S. KAMIMURA, M. NISHIKAWA, H. SAEKI, and Y. TAKAHI 1273

Effect of leachates from peach soil and roots on bacterial canker and growth of peach seedlings ..... W. A. CHANDLER and J. W. DANIELL 1281

Effect of temperature on bacterial canker in peach seedlings grown in old and new peach soil ..... J. W. DANIELL and W. A. CHANDLER 1284

Evidence of pectinase activity between Cronartium ribicola and Pinus monticola ..... B. L. WELCH and N. E. MARTIN 1287

Tolerance of fruit from different pepper lines to Erwinia carotovora ..... J. A. BARTZ and W. M. STALL 1290

Formation and dispersal of Cylindrocladium crotalariae microsclerotia in infected peanut roots
R. C. ROWE, S. A. JOHNSTON, and M. K. BEUTE 1294

Histochemistry and isolation of gossypol and related terpenoids in roots of cotton seedlings
M. E. MACE, A. A. BELL, and R. D. STIPANOVIC 1297

Effect of Pythium irregulare on cotton growth and yield, and joint action with other soil-borne pathogens
R. W. RONCADORI, P. S. LEHMAN, and S. M. MC CARTER 1303

Infection and colonization potential of sporangia, zoospores, and chlamydospores of Phytophthora palmivora in soil ..... W. H. KO and M. J. CHAN 1307

Cellular morphology and reproduction of the mycoplasmalike organism associated with citrus stubborn disease ..... A. A. FUDL-ALLAH and E. C. CALAVAN 1309

Dispersion and deposition of spores of Fomes annosus and fluorescent particles .... R. L. EDMONDS and C. H. DRIVER 1313

Relationship of Datura quercina and tobacco streak viruses ..... J. R. EDWARDSON and D. E. PURCIFUL 1322

Purification of cocoa necrosis virus from cocoa leaves ..... D. ADOMAKO, G. K. OWUSU, and K. K. ODURO 1325

Epiphytic survival Pseudomonas syringae on hairy vetch in relation to epidemilogy of bacterial brown spot of bean in Wisconsin ..... G. L. ERCOLANI, D. J. HAGEDORN, A. KELMAN, and R. E. RAND 1330

Pathogenicity and infection sites of Aspergillus species in stored seeds ..... G E. HARMAN and F. L. PFLEGER 1339

Histopathology of chrysanthemum stems artifically inoculated with Erwinia chrysanthemi
B. W. PENNYPACKER, P. E. NELSON, and R. S. DICKEY 1344

Interactions of herbicides and nematicides with root disease of snapbean and southern pea ..... D. R. SUMNER 1353

Particle-length variability of the pea seedborne mosaic virus ..... R. O. HAMPTON, J. E. KNESEK, and G. I. MINK 1358

Host specificity of Nigerian and North American isolates of Corynespora cassiicola
P. T. ONESIROSAN, D. C. ARNY, and R. D. DURBIN 1364

Shoot blight and stem dieback of Pieris japonica caused by Phytophthora citricola, P. citrophthora, and Botryosphaeria dothidea ..... W. W. P. GERLACH, H. A. J. HOITINK, and C. W. ELLETT 1368

Relative prevalence and virulence of Phytophthora species involved in rhododendron root rot
H. A. J. HOITINK and A. F. SCHMITTHENNER 1371

PHYTOPATHOLOGICAL NOTES

Measurement of electric currents in clear, discolored, and decayed wood from living trees ..... T. A. TATTAR 1375

Tolerance in Cercospora arachidicola to benomyl and related fungicides ..... R. H. LITTRELL 1377

No. 11 – NOVEMBER

Harvey W. Rankin, 1893-1973 ..... H. D. WELLS and C. R. JACKSON 1379

Computer-generated hypothetical genotypes for reaction and pathogenicity of wheat cultivars and cultures of Puccinia graminis tritici ..... W. Q. LOEGERING and C. H. BURTON 1380

The relationship between epidemics of Septoria leaf blotch and yield losses in spring wheat ..... Z. EYAL and O. ZIV 1385

Role of flagellar motility in the invasion of bean leaves by Pseudomonas phaseolicola
N. J. PANOPOULOS and M. N. SCHROTH 1389

Isolation and identification of a volatile fungistatic substance from alkaline soil
W. H. KO, F. K. HORA, and E. HERLICSKA 1398

The causal organism of bacterial black spot of mangoes ..... P. L. STEYN, N. M. VILJOEN, and J. M. KOTZÉ 1400

The relationship of irrigation timing and soil treatments to control potato scab
J. R. DAVIS, G. M. MC MASTER, R. H. CALLIHAN, J. G. GARNER, and R. E. MC DOLE 1404

Sustained Cytospora-resistance in Italian prune cultivars infected with Prunus ringspot virus ..... A. W. HELTON 1410

Distribution, enumeration, and identification of nitrogen-fixing bacteria associated with decay in living white fir trees ..... P. E. AHO, R. J. SEIDLER, H. J. EVANS, and P. N. RAJU 1413

Association of early-season vesicular-arbuscular mycorrhizae with increased growth and development of cotton ..... J. R. RICH and G. W. BIRD 1421

Meristem culture frees strawberries of mild yellow edge, pallidosis, and mottle diseases R. H. MULLIN, S. H. SMITH, N. W. FRAZIER, D. E. SCHLEGEL, and S. R. MC CALL 1425

A gummosis disease of peach trees caused by Botryosphaeria dothidea ..... D. J. WEAVER 1429

Pisatin accumulation and lesion development in peas infected with Aphanomyces euteiches, Fusarium solani f. sp. pisi, or Rhizoctonia solani ..... S. G. PUEPPKE and H. D VAN ETTEN 1433

Infection of onion leaves by Pseudomonas cepacia ..... S. O. KAWAMOTO and J. W. LORBEER 1440

Soybean seed rot and the relation of seed exudate to host susceptibility ..... B. L. KEELING 1445

Inheritance of resistance to watermelon mosaic virus 2 in Phaseolus vulgaris ..... R. PROVVIDENTI 1448

A systems analysis approach to establishing research objectives for control of aflatoxin production in cotton seed ..... H. H. RAMEY, JR. 1451

Epiphytotics of maize dwarf mosaic and maize chlorotic dwarf diseases in Ohio R. LOUIE, J. K. KNOKE, and D. T. GORDON 1455

Relationship of chilling to development of hardcore in sweetpotatoes R. H. DAINES, M. J. CEPONIS, and D. F. HAMMOND 1459

Germination behavior of Scirrhia acicola conidia on pine needles ..... E. C. SETLIFF and R. F. PATTON 1462

Physiological specialization between races of Plasmopara halstedii in America and Europe ..... D. E. ZIMMER 1465

PHYTOPATHOLOGICAL NOTES

Penetration of maize leaves by Helminthosporium turcicum ..... R. S. KNOX-DAVIES 1468

Population changes of Pseudomonas glycinea on germinating soybean seeds .. J. A. LAURENCE and B. W. KENNEDY 1470

Extraction of oat straw, flax, and amended soil to detect substances toxic to the root-knot nematode ..... L. JOHNSON 1471

Intracellular occurrence of bacteria in mummy-diseased mushrooms .. A. VAN ZAAYEN and H. A. J. I. WATERREUS 1474

Cercospora and Cercosporidium tolerance to benomyl and related fungicides in Alabama peanut fields ..... E. M. CLARK, P. A. BACKMAN, and R. RODRIGUEZ-KABANA 1476

Relationship between mode of application of thiabendazole and its effectiveness for control of green mold and inhibiting fungus sporulation on oranges ..... Y. GUTTER, U. YANKO, M. DAVIDSON, and M. RAHAT 1477

Control of American chestnut blight by trunk injection with methyl-2-benzimidazole carbamate (MBC) ..... R. A. JAYNES and N. K. VAN ALFEN 1479

No. 12 – DECEMBER

Otto Herman Elmer, 1891-1973 ..... O. J. DICKERSON and L. K. EDMUNDS 1481

Matthias C. Richards, 1906-1972 ..... A. E. RICH and B. L. RICHARDS, JR. 1482

Longevity of Ceratocystis fagacearum in ammate treated and nontreated root systems ... J. M. SKELLY and F. A. WOOD 1483

Meloidogyne graminis and Meloidogyne spp. on zoysia: infection, reproduction, disease development, and control ..... M. P. GRISHAM, J. L. DALE, and R. D. RIGGS 1485

Properties of a strain of tobacco mosaic virus isolated from white ash trees ..... A. O. LANA and G. N. AGRIOS 1490

Predisposition to Diplodia stalk rot in corn affected by three Helminthosporium leaf blights ..... J. M. FAJEMISIN and A. L. HOOKER 1496

Effect of soil moisture and temperature on viability of sclerotia of Sclerotium oryzae .... R. KEIM and R. K. WEBSTER 1499

The association of Aspergillus flavus with hemipterous and other insects infesting cotton bracts and foliage ..... L. W. STEPHENSON and T. E. RUSSELL 1502

Susceptibility of "resistant" tomato cultivars to Fusarium wilt ..... J. P. JONES and P. CRILL 1507

Variations of single-basidiospore isolates of Thanatephorus cucumeris C. C. TU, N. C. SCHENCK, and J. W. KIMBROUGH 1510

Metabolic fate of methyl-2-benzimidazole carbamate in melon plants J. P. ROUCHAUD, J. R. DECALLONE, and J. A. MEYER 1513

Survival of Xanthomonas campestris in soil ..... N. W. SCHAAD and W. C. WHITE 1518

Response of cultured cells of systemic and local lesion tobacco hosts to microinjection with TMV ..... T. E. RUSSELL and R. S. HALLIWELL 1520

Etiological aspects of bacterial blight of Philodendron selloum caused by Erwinia chrysanthemi J. F. KNAUSS and J. W. MILLER 1526

Nonsurvival of Ceratocystis fagacearum in frass of oak bark beetles and ambrosia beetles ..... J. D. PEPLINSKI and W. MERRILL 1528

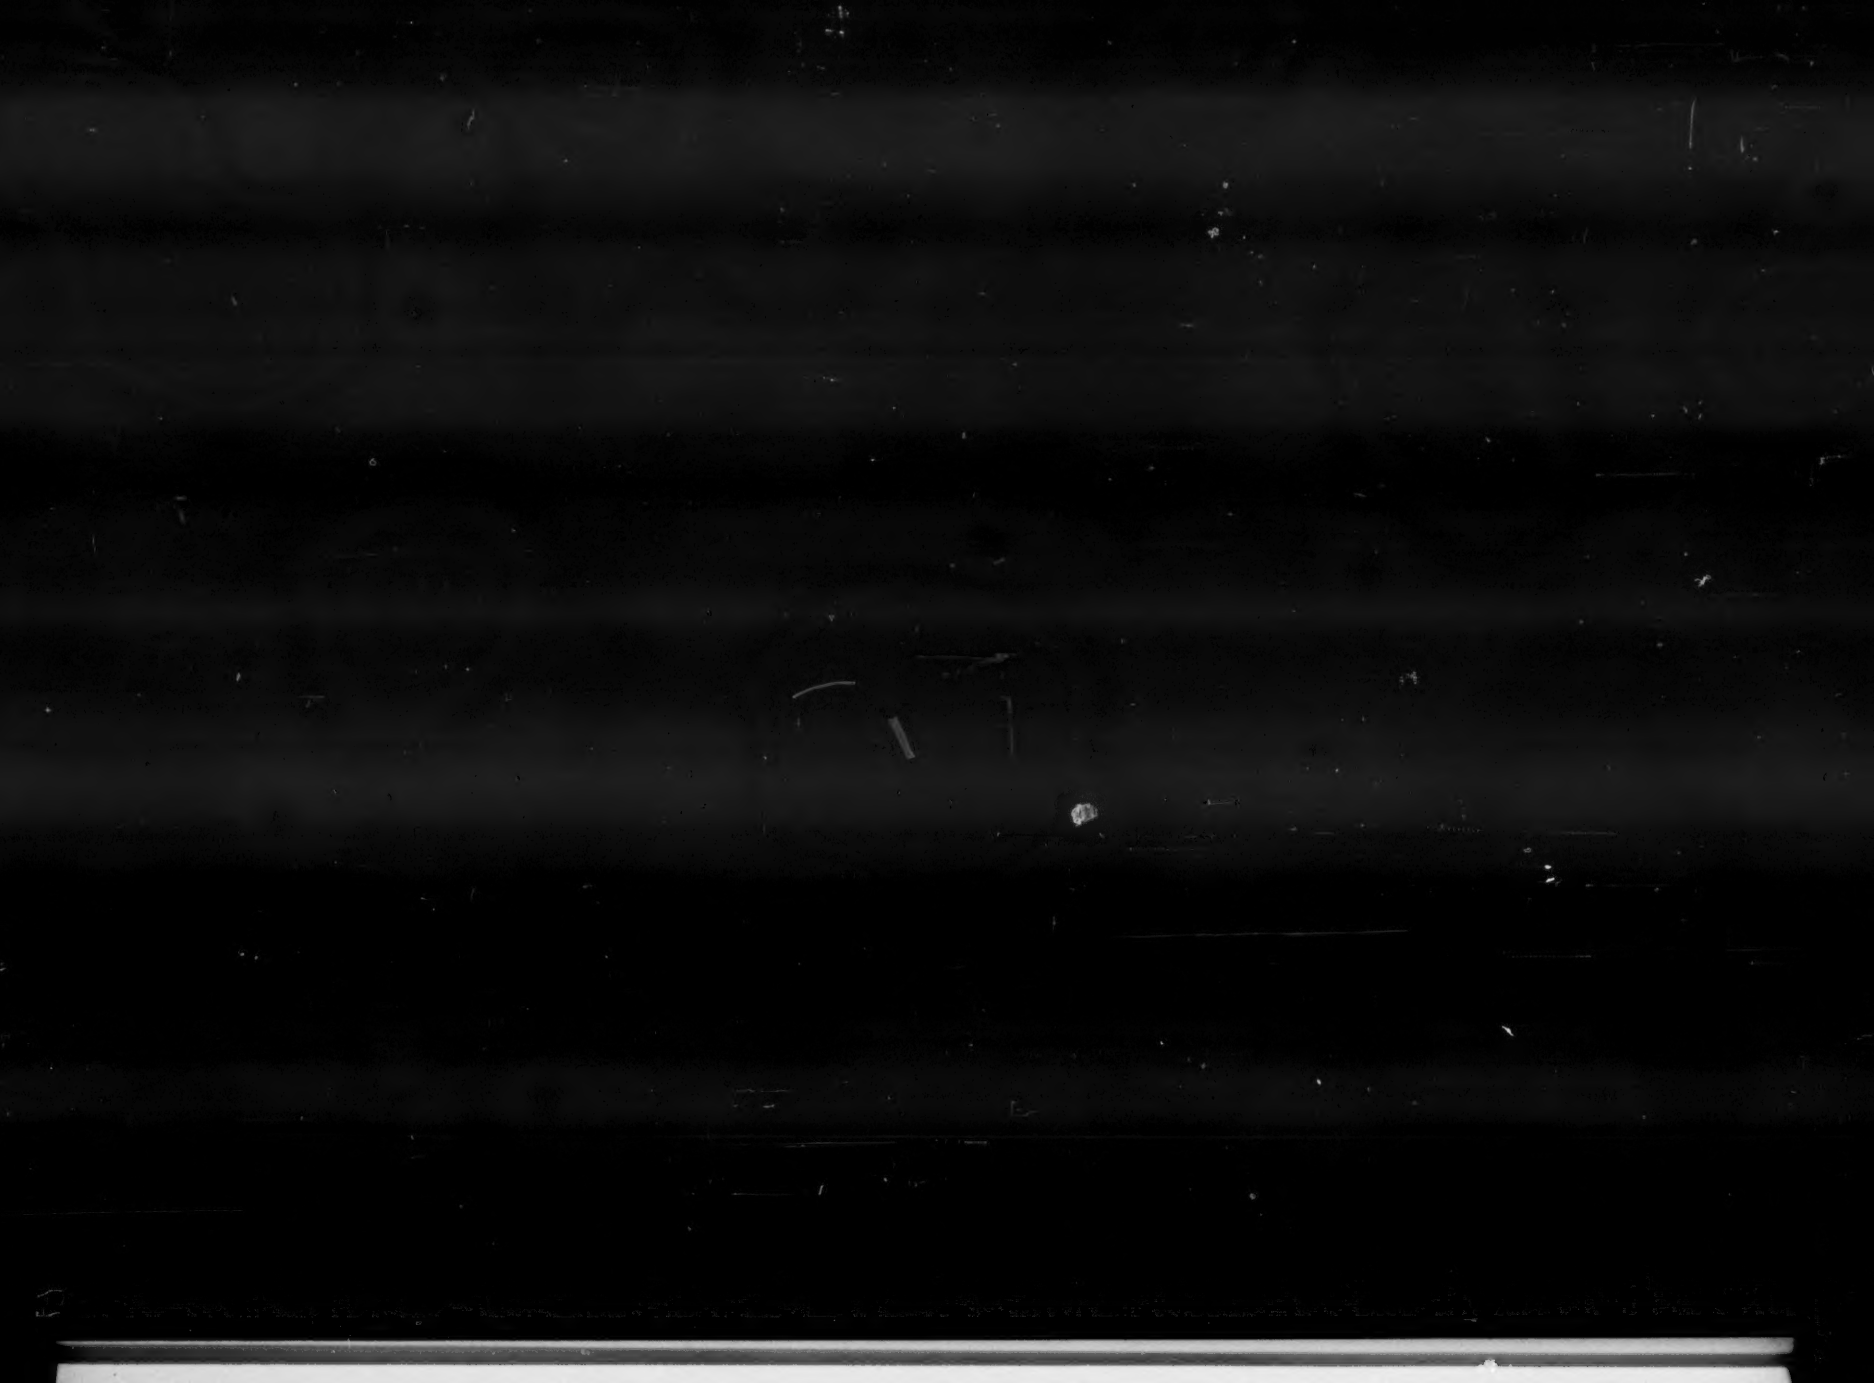
Sporulation and germination of Phytophthora lateralis ..... E. J. TRIONE 1531

Resistance reactions of castor and guar to root-knot nematodes ..... C. C. ORR and E. D. MOREY 1533

Stress predisposes young filbert trees to bacterial blight .... L. W. MOORE, H. B. LAGERSTEDT, and N. HARTMANN 1537

Invasion mechanisms of Cronartium ribicola in Pinus monticola bark ..... B. L. WELCH and N. E. MARTIN 1541

PHYTOPATHOLOGICAL NOTES

Isolation and identification of two serotypes of broad bean wilt virus ..... J. K. UYEMOTO and R. PROVVIDENTI 1547


Index for 1974 ..... *1*
Errata *23*
Tables of Contents for 1974 i
